Re: Letter of Interest
Notice to Providers of Professional Services
2023-2024 Fiscal Year

Dear County of Hawaii:

EnviroQuest, Inc. is a Hawaii corporation providing environmental consulting services. We are responding to your annual request for service providers.

Please find attached –

- Statement of Qualifications, Key Personnel, Certifications
- DPW Form 120
- Proof of Insurance

EnviroQuest is a Hawaii corporation established in 2001. We currently have 19 employees and have averaged 17 over the last five years.

Our contact person is Steve Tanaka (stanaka@enviroquestinc.com).

Thank you for your consideration for the environmental and industrial hygiene category.

Sincerely,

EnviroQuest, Inc.

Randy Takemoto
Businesss Manager

EnviroQuest

Statement of Qualifications

About EnviroQuest, Inc.

EnviroQuest, Inc. (EQI) is a privately held Hawaii corporation providing a comprehensive range of industrial hygiene, health, and safety services to public and private sector clients since 2001 with an average of 17 employees over the last 5 years. Situated in Aiea, Hawaii and Kanagawa, Japan, EQI services projects primarily in Hawaii, Japan, Singapore and Guam. Our clients include Hawaii public utilities, federal, state, and local governments, property management firms, commercial property owners, professional engineers and architects, law firms, contractors, and private homeowners. With local and international experience, EQI has emerged as one of the most experienced companies in Hawaii. We are committed to providing our clients with professional and responsive service.

EnviroQuest, Inc. specializes in all aspects of industrial hygiene services. We conduct building surveys for hazardous materials (asbestos, lead, PCB's, etc.); develop specifications for the abatement of hazardous materials; provide continuous project management and air monitoring services during hazardous material abatement activities; conduct indoor air-quality investigations; measure workplace exposure hazards; and conduct employee awareness training classes for Occupational Safety and Health Administration (OSHA) and Hawaii Occupational Safety and Health compliance (HIOSH).

EnviroQuest, Inc.'s main contact person is Steven Tanaka and his email address is stanaka@enviroquestinc.com.

Building Inspections for Hazardous Materials

EQI staff routinely conducts building inspections for asbestos-containing material (ACM), lead-based paint (LBP), polychlorinated biphenyl's (PCB's), and mold infestation. The inspections are conducted by EQI industrial hygienists certified as an EPA AHERA Building Inspector and Management Planner and I or an EPA Lead Inspector and Risk Assessor.

EQI staff have surveyed over 6,000 buildings in Hawaii, California, Japan, Singapore, Korea, Guam, Saipan, Kwajalein, and Diego Garcia.

Hazardous Material Abatement Specifications

EQI staff has designed over 3500 hazardous material abatement projects. Hazardous material abatement specifications are developed in accordance with Environmental Protection Agency (EPA), Occupational Safety and Health Administration (OSHA), Hawaii Occupational Safety and Health (HIOSH), and other regulatory agency requirements and guidelines.

EQI works with our clients to develop creative, cost-effective solutions to addressing hazardous material problems, including public relations support and abatement project management.

Abatement Project Management

Project Management services are geared so that EQI manages the day-to-day tasks associated with the hazardous material abatement. EQI works closely with the building owner, contractor, and architect/engineer to ensure that every aspect of the abatement work is closely managed. Project management services include:

- Air Monitoring
- Baseline Samples
- Work-in-Progress Samples
- Post abatement Samples
- Laboratory Analysis
- Documentation Management

Air Monitoring

Air monitoring is conducted during all phases of the abatement activity. The three sample types collected include:

- Baseline Samples: Samples are collected to measure ambient material concentrations prior to any abatement action.
- Work-in-Progress Samples: Samples are collected daily during the abatement activity. Samples are collected inside the work area/containment, outside the work area/containment, and at the exhaust to any negative air filtration units. These samples will enable EQI to determine if work practices are contributing to an increase in material concentrations. If material concentrations become elevated, EQI will instruct the contractor to modify their work practices.
- Post Abatement Samples: Samples are collected at the completion of each abatement action to ensure a hazardous material free area.

Laboratory Analysis

EQI utilizes only laboratories deemed proficient through successful participation in American Industrial Hygiene Association (AIHA) Proficiency Analytical Testing (PAT) and Environmental Lead Laboratory Accreditation Programs (ELLAP) as well as the U.S. Department of Commerce, National Institute of Standards and Technologies (NIST) National Voluntary Laboratory Accreditation Program (NVLAP).

Indoor Air Quality Studies - Mold Remediation

Indoor Air Quality (IAQ) is a rapidly evolving aspect of industrial hygiene. IAQ studies are conducted in accordance with current guidelines and recommendations by the American Conference of Governmental Industrial Hygienists (ACGIH), American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc. (ASHRAE), National Air Duct Cleaners Association (NADCA), and OSHA.

EQI begins all IAQ studies by interviewing building occupants, evaluating the working environment, and then recommending appropriate corrective actions or sampling schemes.

Sampling typically includes the collection of non-culturable spore samples using spore traps; culturable mold and bacteria samples using Andersen samplers; organic and inorganic vapors using sorbent tubes and collection bags.

EnviroQuest

BIOGRAPHIES

As a service organization, our most valuable assets are the team of professionals dedicated to providing responsive and professional service to our clients. An overview of professional experience of our key personnel is provided herein.

Steven Tanaka - Principal/Industrial Hygienist

Mr. Tanaka is an industrial hygienist with over 36 years of experience in industrial hygiene and environmental consulting. He has experience in all aspects of asbestos, lead, PCB, and indoor air quality assessments and abatement design; OSHA compliance air monitoring and workplace assessments; emergency spill response, containment and remediation; and providing OSHA and EPA compliance training.

Mr. Tanaka oversees all the activities of EQI Hawaii and Japan offices, including daily operations, business development, and the technical development of the staff. Mr. Tanaka is certified as an instructor of EPA AHERA Asbestos MAP courses and EPA Lead courses. Mr. Tanaka has a working knowledge of Environmental Protection Agency, Occupational Safety and Health Administration and Japan Environmental Governing Standards in Japan, Hawaii, and California. Mr. Tanaka has worked throughout Japan and the Western United States. His educational foundation is in biology, chemistry and business. Mr. Tanaka is also a trained analyst in phase contrast, polarized light, and transmission electron microscopy.

Education

California State University, Fullerton; Bachelor in Biology, Bachelor in Chemistry

Associated Training and Certifications

- Certified Mold Remediator - Indoor Air Quality Association, Inc.
- NIOSH 582, "Sampling and Evaluating of Airborne Asbestos Dust" - University of Alabama
- Microscopical Identification of Asbestos - McCrone Research Institute, Chicago
- Transmission Electron Microscopy Asbestos Analysis Course - Georgia Institute of Technology, Atlanta
- Guidelines for the Assessment of Bioaerosols in the Indoor Environment, AIHA
- EPA AHERA Asbestos Project Designer, Building Inspector, Contractor Supervisor, Management Planner
- EPA Lead Inspector, Project Designer, Contractor Supervisors
- OSHA 40-Hour HAZWOPER Supervisor Certified
- OSHA 40-Hour HAZWOPER Train the Trainer Certified

EnviroQuest

Jim Cardenas - Principal/Industrial Hygienist

Mr. Cardenas is an industrial hygienist with over 26 years of experience in industrial hygiene and environmental consulting. Mr. Cardenas specializes in hazardous material abatement project management, hazardous material building inspections, and abatement air monitoring.

Mr. Cardenas is responsible for managing the day-to-day activities of all EQI projects ensuring they are completed in a timely manner and within budget. He is also responsible for the scheduling of all the other Industrial Hygienists, preparing proposals, and marketing development. Mr. Cardenas is also a trained analyst in phase contrast microscopy (PCM).

Education

Saint Louis University, Philippines, Bachelor in Nursing

Associated Training and Certifications

- NIOSH 582, "Sampling and Evaluating of Airborne Asbestos Dust"
- OSHA 40-Hour HAZWOPER
- EPA AHERA Asbestos Building Inspector, Management Planner, Contractor Supervisor,
- EPA Lead Risk Assessor, Inspector, Abatement Supervisor
- Microbial Remediation Supervisor - American Council for Accredited Certification

EnviroQuest

Jesus V. Sacramento-Civil Engineer/Industrial Hygienist

Mr. Sacramento is a civil engineer | industrial hygienist with over 26 years of experience in industrial hygiene and environmental consulting. He specializes in hazardous material abatement project management, hazardous material building inspections, and abatement air monitoring.

Mr. Sacramento is responsible for managing the day-to-day activities of all EQI projects ensuring they are completed in a timely manner and within budget. Mr. Sacramento is also a trained analyst in phase contrast microscopy (PCM) and as an operator of portable X-ray fluorescent (XRF) metal detection units.

Education

Saint Louis University, Philippines, Bachelor of Civil Engineering

Associated Training and Certifications

- Civil Engineer
- NIOSH 582, "Sampling and Evaluating of Airborne Asbestos Dust"
- EPA AHERA Asbestos Building Inspector, Management Planner, Contractor Supervisor,
- EPA Lead Risk Assessor, Inspector, Abatement Supervisor
- OSHA 40-Hour HAZWOPER
- Shipyard Competent Person Training

EnviroQuest

David Leigh - Certified Industrial Hygienist

Mr. Leigh is a certified industrial hygienist and project manager with over 25 years of experience as an industrial hygienist and environmental consultant. He specializes in hazardous material abatement project management, hazardous material building inspections, and abatement air monitoring.

Mr. Leigh is responsible for managing the day-to-day activities of all EQI projects ensuring they are completed in a timely manner and within budget. Mr. Leigh is also a trained analyst in phase contrast microscopy (PCM) and as an operator of portable X-ray fluorescent (XRF) metal detection units.

Education

University of California Los Angeles; Master of Science, Public Health, Environmental Sciences
University of California Irvine, Bachelor in Biology

Associated Training and Certifications

- EPA AHERA Asbestos Project Designer, Building Inspector, Contractor Supervisor, Management Planner
- EPA Lead Inspector, Project Designer, Contractor Supervisors
- NIOSH 582, "Sampling and Evaluation of Airborne Asbestos Dust"
- OSHA 40 HAZWOPER

EnviroQuest, Inc. (EQI) is a small business specializing in providing industrial hygiene, asbestos, and lead services. EnviroQuest is based in Honolulu, was established in April 2001 and is staffed by two principal industrial hygienists, a certified industrial hygienist, one civil engineer/industrial hygienist, 10 industrial hygiene technicians, technical writers and one accountant.

EnviroQuest comprehensive industrial hygiene services include the recognition, evaluation, and control of occupational hazards, specifically those dealing with exposure to lead, asbestos, toxic gases, organic chemicals, petroleum products, noise, dusts, metals, and pesticides. EnviroQuest is also experienced in areas of industrial noise mitigation; industrial ventilation; conducting indoor air quality investigations; developing respiratory protection, hazard communication, and confined-space entry programs; and conducting Phase I environmental site assessments.

Specialized Equipment: EnviroQuest utilizes, when necessary and appropriate, the equipment and instruments listed below.

- Phase Contrast Microscopes
- Polarized light microscopes
- High and low volume air sampling pumps
- X-ray Fluorescence Spectrum Analyzer
- Oxygen/Combustible Gas Meter
- Borescope
- Andersen Impact Samplers
- Thermo-anemometer
- Manometers
- Noise Dosimeters
- Sound Pressure Level Meters
