Mr. Robert Ewbank
Department of Information Technology
County of Hawai'i
25 Aupuni Street
Hilo, HI 96720

**Subject: Statement of Qualifications & Letter of Interest
Department of Information Technology, County of Hawai'i for
Fiscal Year 2024-2025**

Dear Mr. Ewbank:

G70 is pleased to express interest in providing professional services to the Department of Information Technology for the Fiscal Year 2024-2025 in the following categories:

DS.4) Computer Engineering (GIS Mapping/Programming Services)

Established in 1971, G70 is Hawai'i's largest full service multi-discipline design firm providing integrated services for sustainable development in architecture, civil engineering, planning and environment, geographic information systems, technology, and interior design. Our team brings a collective high level of talent unique in our approach and broad thinking from typical firms. G70's team will:

- ✓ **Create Value** – understanding our client, culture and community to design innovative solutions that deliver a successful project on time, and on budget.
- ✓ **Provide a “One Stop Shop” of Skilled Professionals** - collaborative and multidiscipline team of professionals including engineers, planners, architects, interior designers, information technologists, cultural specialists, software engineers, GIS technicians, graphic designers, asset managers, and communications personnel.
- ✓ **Be Culturally Relevant in Design and Project Management** – years of experience and involvement with the local culture, community and government agencies allow us to deliver successful projects.
- ✓ **Promote Sustainable Principles** – delivering solutions that consider the context of the project using a cross discipline, life cycle perspective to integrate and protect resources and the community.
- ✓ **Leverage Technology** – knowledge and ability to utilize technological tools to provide efficient and valued added service.

1. The name of the firm or person, contact information including email address, the principal place of business, and location of all of its offices:

Name of Firm: Group 70 International dba G70
Firm Address: 111 S. King Street, Suite 170
Honolulu, HI 96813

Contact Person: Mark Kāwika McKeague, AICP, Principal Planner
Email Address: kawikam@g70.design
Phone number: (808) 523-5866

2. The age of the firm and its average number of employees over the past five years:

G70 was founded in 1971. We have averaged 100 employees over the past five years and we currently have 104 employees.

3. The education, training, and qualifications of the individual, or if a firm, its key employees in accordance with HRS 103D-304 and/or the professional and scientific occupation series contained in the United States Office of Personnel Managements' Qualifications Standards Handbook:

Please see Resumes of Key Personnel

4. A list of recent projects and the names of up to five clients who may be contacted, including at least two for whom services were rendered during the preceding year:

- University of Hawai'i at Mānoa – PV Site Sustainability Assessment and 3D Campus Map
- National Preparedness Training Center COVID-19
- West Kaua'i Community Plan GIS
- NOAA GIS Training
- NAVFAC Hawai'i Cultural and National Resources
- O'ahu Coastal Evacuation Planning
- US Army Corps of Engineers West Maui Watershed Study

Client References		
Name	Organization	Phone Number
Mr. Catherine Taschner	City and County of Honolulu – Department of Land Management	(808) 768-4271
Mr. Andrew Choy	Hawai'i State Department of Hawaiian Home Lands, Hawaiian Homes Commission, Planning Office	(808) 620-9279
Ms. Lynn Tanaka	NAVFAC Pacific	(808) 473-0530
Mr. Milton Yoshimoto	U.S. Army Corps of Engineers	(808) 438-2250
Mr. Barry Usagawa	City and County of Honolulu, Honolulu Board of Water Supply	(808) 748-5900

5. Any promotional or descriptive literature which the individual or firm desires to submit.

We have provided supporting data for G70 to include:

- Company Profile
- Key Personnel Resumes
- Project Profiles

Department of Information Technology, County of Hawai'i
LOI and SOQ for Fiscal Year 2024-2025

company profile

about g70

FULL SERVICE

Established in 1971, G70 is Hawai'i's largest full service multi-disciplined design firm providing integrated services for sustainable development in architecture, interior design, civil engineering, and planning & environmental services. We have specific expertise in design for resort communities, residential projects, educational and medical facilities, mixed-use commercial ventures, utilities and roadway infrastructures, and all phases of master planning for major land holdings.

CREATING VALUE

Based in Honolulu, G70 is staffed with over 100 full-time professionals, including: licensed architects, interior designers, civil engineers, planners, technical specialists, and other support personnel. The firm is on the forefront of sustainable design practices with 33 LEED (Leadership in Energy and Environmental Design) accredited professionals in all areas of service.

CULTURALLY RELEVANT

G70 is about stewardship. Our work begins with understanding our client, the host culture of each project, and the surrounding community. We work with communities to create designs that not only best serve the people, but also incorporate the cultural, historical and environmental aspects of the land.

SUSTAINABLE DESIGNS

Sustainable principles cross all disciplines in project development from planning to design, integrating land resource management and cultural heritage with cutting edge sustainable technology. G70 offers sustainable design methods and tools to plan, build, and monitor the utilities and infrastructure of a project site. We provide asset management resources to maintain, secure, and optimize operating costs for land owners and developers.

TECHNOLOGY

G70 is progressive in its use and application of design software to enhance visualization and bring efficiency to the design process. Our current list of software being utilized is:

- Revit 2018, 2020
- Dynamo Revit
- AutoCad 2018, 2020
- SketchUp Pro 8
- Photoshop
- Illustrator
- InDesign
- Rhino 5.5
- BIM 360
- Google Earth Pro
- Grasshopper Arc GIS
- Lumion 6.0
- Civil 3D 2018, 2020
- Arc GIS
- Infraworks
- Formlabs

ARCHITECTURE

G70 designs architecture that represent the lifestyles of communities and respect the natural landscape surrounding each project. Our emphasis on cultural context, honoring traditional values, combined with contemporary innovation and planning of sustainable environments creates harmonious, memorable designs for our future.

CIVIL ENGINEERING

Civil Engineering Consulting Services include the full range of services for a civil consulting firm. Our capabilities are broadened significantly with the overlapping services and abilities of G70, including Planning and Environmental Services, Land-Use Permitting, Architecture, Sustainable Development, GIS and Geospatial Services, and Asset Management.

INTERIOR DESIGN

We believe that interior spaces should have a timeless quality and compliment the architectural style of its environment. Our team includes architects specializing in interior design. We offer custom designed finishes, furniture and architectural elements that offer signature details to enhance our client's individual style.

PLANNING & ENVIRONMENT

G70 provides comprehensive services to meet the challenges in the planning of communities, regions and the preservation of land resources. We engage the community in the process, assess the land, and prepare the necessary documents to expedite the due diligence process in a timely manner.

sustainable design

APPROACH

HONOR & INTEGRATE

With a deep understanding of an area's culture, heritage, and history at the onset of the design process, G70 is able to create distinctive, award-winning environments, richly appealing, harmonious and increasing in value over time. This is the foundation of good planning and design.

RESPECT & UNDERSTAND

We are committed to sustainable design principles, approaching each project with in-depth research of the site, to understand its environmental context, geological and topographical features, wind and solar characteristics, and historical and cultural background. We provide innovative GIS and 3D visualization to assist in planning, design and decision making.

PLAN & MAINTAIN

G70 offers sustainable design methods and tools to plan, build, and monitor the utilities and infrastructure of a project site. With GIS capabilities and state-of-the-art software, we provide asset management resources to maintain, secure, and optimize operating costs for developers.

LEAD FUTURE DESIGN

Our mission is to foresee a sustainable future now: to initiate, plan, design and build the best-in-class projects that demonstrate leadership in the global sustainability theater.

sustainable design

INNOVATION

EXPERTISE

G70 is on the cutting edge of sustainable development, recognizing the importance and impact of built environments of all types and sizes on individual lives, whole communities, and the entire planet. The firm's resources include a growing number of in-house LEED AP architects, planners, and interior designers working strategically with our clients and partners.

LEED SERVICES

- Pre-evaluation: identifying economically viable LEED compliance
- Certification: processing and documenting a project through design and construction
- Post-Certification: providing project asset management to ensure long term performance
- Water Efficiency Improvement Assessment
- Credit Products & Technologies Specification
- Credit Innovation & Design programming

ACCOUNTABILITY

Our Sustainable Development Division created a proprietary methodology to map specific LEED components such as potable water consumption, graywater utilization, energy consumption, carbon footprint, waste generation, and open space. Following certification, G70 will monitor the ongoing performance of LEED certified projects. This innovative process ensures that the LEED building performs as designed throughout its life.

planning and environment

Services Overview

G70 provides a variety of services to meet the complex challenges of planning land resources and diverse communities with a sustainable future. Our extensive experience in all phases of the development process includes Master Planning, Community Building and Land Use Entitlements. We are staffed to manage large-scale Environmental and Physical Planning with architecture to create appealing, sustainable settings.

Our urban and environmental planners collaborate with in-house cultural experts, as well as solicit community input to incorporate historical and cultural elements in our planning process. Before proceeding with any project, we ensure that our environmental studies and land use plans are accepted by the community and the approving agencies.

G70 provides landowners and government agencies with the full range of land use permitting and entitlement services at both the State and County levels.

G70 planning services include:

- Community Master Plans
- Resort Master Plans
- Educational Campus Plans
- Regional, General and Specific Plans
- Urban Design Plan / Design Guidelines
- Park and Open Space Plans
- Community Involvement and Facilitation
- Feasibility Studies and Alternatives Analysis
- Land Use Permits
- Development Constraints Analysis (regulatory, environmental, technical)
- Regional and Area-wide Land Use Planning
- Detailed Property and Site Assessments, and Due Diligence Reporting
- Environmental Assessments and Environmental Impact Statements
- Cultural & Historic Resource Management

planning

GEOGRAPHICAL INFORMATION SYSTEM (GIS)

G70 utilizes GIS technology as an essential tool in a broad-range of architectural, planning, sustainable development, and asset management projects. Our experience applying GIS technology includes:

- *Land Use Planning*
- *Military Planning*
- *Site Investigation/Analysis/Selection*
- *Entitlement Process*
- *Emergency Preparedness/Management*
- *Flood Hazard Mapping*
- *Environmental Planning/Management*

In addition, we provide GIS development for clients requiring needs assessments, requirements analysis, data collection and conversion, application development, geo-database design/creation, mapping, and data modeling and analysis.

At G70 we establish a clear project task that describes how GIS will be applied and support each project. Whether the task is to implement an interactive tool for accessing useful information through online maps or to conduct complex analysis of both geospatial and non-geospatial data, we deliver high quality GIS products to our clients.

Our GIS Services group consists of a multi-disciplinary team of GIS/Geospatial professionals, GIS-trained planners, GIS-trained architects, and GIS-trained graphic designers working across the company as an integrated technology team.

civil engineering

Services Overview

G70 is a full-service civil engineering practice. We provide services for a wide variety of project types serving the public and private sectors, including:

- Land Development
- Residential Site Development
- Commercial Site Development
- Energy Systems Development
- Industrial Site Development
- Resort/Hospitality Site Development
- Institutional/Educational Site Development
- Transportation
- Wastewater
- Water Supply and Distribution
- Utility Infrastructure
- Stormwater Management
- Sustainable Design

Civil Engineering Consulting Services include the full range of services for a civil consulting firm. Our capabilities are broadened significantly with the overlapping services and abilities of G70, including Planning and Environmental Services, Land-Use Permitting, Architecture, Sustainable Development, GIS and Geospatial Services, and Asset Management.

- Site Master Planning and Site Selection
- Infrastructure Master Planning
- Feasibility Studies and Due Diligence
- Preliminary Engineering Report (PER)
- Permitting – NPDES, UIC, Dept. of the Army, Water Quality Certification, SCAP
- Environmental Assessments (EA) and Environmental Impact Statements (EIS)
- Drainage and Water Quality
- Watershed and Ecosystem Management Planning
- Infrastructure Modeling
- Surface Modeling and Earthwork Analysis
- Geospatial Analysis and Mapping
- Construction Plans, Specifications and Cost Estimates
- Bid Proposals and Contract Documents
- Construction Administration and Observation
- Project Management
- Value Engineering
- Visualization Services
- Community Support and Public Involvement

G70 recognizes important trends in our industry and in our society, and we position ourselves and our company to take advantage of trends by adapting our services and abilities. We also anticipate the needs of our clients and provide services to add value to their projects by incorporating services that are synergistic or complementary to each other.

PAUL T. MATSUDA

P.E., LEED AP
Principal
Director of Civil Engineering

Paul Matsuda, P.E., LEED AP is a principal and the Director of Civil Engineering of G70. Paul has more than 20 years of civil engineering experience in a wide variety of site development, transportation and utility infrastructure projects throughout Hawai'i and the Pacific Northwest. He is responsible for management and delivery of the firm's engineering projects and is actively involved in design and project management for many of them. Paul received a Bachelor of Science degree in civil engineering from the University of Washington and is a licensed professional in Hawai'i, Oregon, and Washington.

JENNIFER LAM

GIS Specialist

EDUCATION:

Master's in Environmental Management
University of Hawai'i at Mānoa, HI

B. S. Ecology, Evolution, and Environment
Purdue University, IN

As a GIS Specialist, Jennifer develops and implements systems and databases to access and store geospatial data. Jennifer's journey in GIS began during her undergraduate years at Purdue University, where she developed a strong foundation in ecological principles, earning a Bachelor's of Science in Ecology, Evolution, and Environment. Her coursework provided her with a solid understanding of spatial analysis and data management techniques, which she further honed while earning her Master's in Environmental Management from the University of Hawaii at Manoa. Her expertise in GIS software such as ArcGIS, QGIS, and ENVI has enabled her to create detailed spatial models and conduct thorough analyses to support decision-making processes.

NPDES Storm Water Public Education Project

ISLAND OF O'AHU

Development of a comprehensive, island-wide inventory of various industrial facilities using existing databases and tracking tools, mapping and GIS analyses of these facilities to help determine priority areas for annual inspection. Provide a comprehensive public education and outreach plan related the City and County of Honolulu's National Pollutant Discharge Elimination System (NPDES) Municipal Separate Storm Sewer System (MS4) permit. Work involves creating a comprehensive island-wide inventory of various industrial facilities using existing databases and tracking tools, and mapping and GIS analyses of these facilities to help determine priority areas for annual inspection. Additional work also includes using GIS in to assess various urbanized neighbors within 10-15 watersheds to evaluate for potential pollution sources and restoration opportunities in sub-watersheds.

Department of Hawaiian Home Lands Anahola Regional Plan

ANAHOLA, KAUAI

G70 provides integrated technical services for our clients which fully address their individual projects needs. One type of integration is using our Global Positioning Systems (GPS) equipment to collect data that will be used within a Geographic Information System (GIS). During the Regional Planning project for Anahola, Kaua'i the G70 Team completed a GPS data collection effort in conjunction with performing a visual field survey of the Makaha lands of the DHHL Anahola region. The data types collected were focused on unmapped roads, surface water resources, and significant community facilities and resources.

Department of Hawaiian Home Lands Kahikinui Regional Plan

KAHIKINUI, MAUI

The collection of geospatial data using Global Positioning Systems (GPS) is a key technical service we provide our clients through our Geographic Information Systems (GIS) department. GPS data collection and a regional planning field survey were conducted for the Department of Hawaiian Home Lands (DHHL) in Kahikinui, Maui. G7o collected multiple types of data using handheld GPS units, including unmapped primitive roads and jeep trails, culturally significant sites and archaeological resources, access gate locations, and important regional community locations. This data is processed into the project GIS which is used to perform analysis and produce maps for the Kahikinui Regional Plan.

Planning

Department of Hawaiian Home Lands Kaua'i Island Plan

KAUA'I, HAWAI'I

The Kaua'i Island Plan provides recommendations for the future use of 25,565 acres of land. The plan identified priority development areas and preliminary lotting schemes for residential homestead parcels. Work included the development of a Geographic Information System (GIS) tool that formulated a baseline of the environmental, cultural, and socioeconomic features of the land with scenarios for potential land uses. These alternative developments were presented and thoroughly discussed at a series of community meetings before finalizing the Master Plan.

Planning & Environment

Department of Hawaiian Home Lands Moloka'i Island Plan

MOLOKA'I, HAWAII

The Moloka'i Island Plan provides recommendations for the future use of 25,868 acres of land, indicating specific areas for prioritizing homestead development. The Master Plan was developed over a 10-month period of reviewing previous land studies and conducting surveys with beneficiaries for their input on lease, location preferences and desired community facilities. The information gathered was analyzed through a Geographic Information System (GIS). GIS formulates a baseline understanding of environmental, socioeconomic and cultural features of land parcels with alternative scenarios for potential land use. These alternatives were presented and thoroughly discussed at a series of community meetings before finalizing the Master Plan.

Department of Hawaiian Home Lands Land Inventory

KAUA'I, HAWAII

Through our Geographic Information Systems (GIS) and Geospatial Technologies department we have developed a robust Land Inventory system using GIS for the Department of Hawaiian Home Lands (DHHL). The Land Inventory program at DHHL was established through the Department's Planning Program to supply the U.S. Census with updated land boundaries in a compatible GIS file format for 2010. Once this exercise is complete, the Land Inventory is expanding to include additional applications to support project and asset management activities across the over 200,000 plus acres that make-up DHHL current land holdings statewide.

State of Hawaii (DOT) Transportation Plan

STATE OF HAWAII

G7o used Geographic Information Systems (GIS) and geospatial analysis to develop integrated planning scenarios for the Hawai'i Department of Transportation (DOT) State Transportation Plan. This geo-visualization depicts the project planning nexus between the Lihue, Kauai airport (LIH), the Nawiliwili Harbor, road improvement, and new development in the surrounding area. Data layers in analysis included future development areas, approach and departure flight tracks, airport noise contours, and state road improvement projects.

NAVFAC Hawai'i Natural and Cultural Resources GIS

O'AHU AND KAUAI

G70's GIS team inventoried, reviewed, and captured cultural and natural resources data from studies conducted within the Commander Navy Region Hawaii Area of Responsibility (CNRH AOR). Three hundred twenty-one cultural and natural resources reports were inventoried and reviewed; a total of 2,050 natural resources features and 2,569 cultural resources features were captured in two geodatabases that are compliant with the Navy Geospatial Data Model 3.01 (NDM 3.01) metadata standard adapted from the Department of Defense's Spatial Data Standard for Facilities, Infrastructure, and Environment 3.0 (SDSFIE 3.0) geospatial database schema. Efforts included georeferencing and digitizing features from historical and contemporary surveys, establishment of workflow processes, training for archaeologists and natural resources specialists, and documentation of the workflow and training. With this tool, archaeologists and natural resources specialists will be able to access, via the Navy's GRX, all past studies and relevant findings that may impact a current proposal for use of a specific location.

GIS Mapping & Analysis

South Kona FEMA Flood Hazard Study

KONA, HAWAI'I

G7o and its team of consultants prepared hydrologic and hydraulic models/calculations to identify the 10-, 25-, 50-, 100-, and 500- year flood plains and 100-yr floodway, within the flood hazard study area of the South Kona District. Using standardized GIS applications, flood hazard mapping was developed which the County of Hawai'i will use amend the Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Maps. As part of this project LIDAR (Light Detection and Ranging) survey mapping was completed for tiled grids from the coastline to approximately elevation 3,600 feet mean sea level.
