I read the 2008 General Plan and was very impressed by the expressed intent in many pages of the document.

As I began reviewing the 2045 General Plan, I noticed the tone was different and that important phrasing was abridged

i.e. Chapter 3-b (2008)

"Provide infrastructure & essential facilities concurrent with growth. Future growth should occur where infrastructure (roads and utilities and essential facilities (i.e. fire, police, schools) are already in place and maintained"

My concern is that the infrastructure will not be required to be built or concurrent with growth & development.

Where I grew up; Rossmore in Los Alamitos, Southern Calif., Our Planners built a road outside of the subdivision wide enough for four lanes and shoulders wide enough for bike lanes and bus stops, even though we had very little traffic for even two lanes at the time.

they also built within the 1.54 square miles square neighborhood, five elementary schools because they had the foresight that young families would be living there, plus two parks. Small shopping centers were built on either end including markets.

How can we be assured these important aspects of the General Plan & its intent to protect the community from developing too quickly so that infrastructure can not keep up?

Makalo,

Charla Thompson

TOP TEN BUZZWORDS

1. **Sustainable** - centralized management and rationing of all resources, especially through 4IR technologies, the prioritization of "future-use" and "future benefits" over the present
2. **Resilient** - predictive profiling and risk management policies, especially through automation, digital transformation, and standardization (gig-work)
3. **Equity** - standardization of outcomes, rationing and redistribution of resources, a justification for data capture and measurement
4. **Inclusive** - forced homogenization and access (e.g. a girls' team to accept boys); quotas; subordinating individual rights to the community, stakeholders' interests trump individual concerns
5. **Innovative** - conforming to Fourth Industrial Revolution technologies (fintech blockchain, automation, etc.) and the digital transformation of all activities
6. **Collaboration** - a model of collective systems alignment, collective impact (using shared language, metrics, goals, etc.), especially concerned with public-private partnerships (P3s) and **Community**
7. **Transparency / Accountability** - Track, trace, report, esp. using blockchain technology to create a permanent digital record of all activity, open-data policies
8. **Diversity** - deliberate disruption of organic patterns of association, an emphasis on identity politics in order to divide and conquer, a justification for human capital scoring
9. **Leadership** - commitment to corporate purpose, adoption of marketing firm language, following the playbook or toolkit; group think
10. **Impact** - any measurable change that can serve as proof of social engineering (for purposes of validating impact investments and pay for success contracts)

AGENDA 2030

The Great Reset
One World Government
Fourth Industrial Revolution
Technocratic Corporatocracy
Total dependency on the state
Social Credit system
Carbon Footprint Surveillance system
Universal Basic Income for compliant citizens
Programmable Central Banking Digital Currency
Depopulation
Mandatory Vaccines for all ages
Controlled fertility and reproduction
Radical assisted suicide and abortion laws
100 % Genetically manipulated food and soil
Ban on all natural remedies and treatments
Robot workforce
Internet of Things & Internet of Bodies
Microchips & implantable brain interface technologies
Constant exposure to non-native EMFs and RFs (5G, 6G, 7G)
Destruction of genders
Destruction of motherhood and fatherhood
Rationing of energy and all natural resources
Restriction on "non-essential" air travel
Smart Cities
Drones, facial recognition cameras, movement sensors
Abolishment of private property
Control and surveillance of nature and wildlife
Restricted access to wilderness (human free zones)
"Sustainable development" of the New World Order
