Subject: Eleventh-hour request

To: <april.surprenant@hawaiiicounty.gov>

Good morning, April.

I'm looking forward to seeing you and your crew today here in North Kohala.

I have an important request that I hope you can attend to once I am there, or before if possible. My deep apology for the eleventh-hour tardiness, which is based on my impairment.

Please consider adding these two definitions to the appropriate place in the General Plan for North Kohala or other island districts

- **Green Energy Park** - A designated area or facility focused on the production and promotion of renewable energy sources. This can include solar, wind, geothermal, and biomass energy technologies. The park often features installations like solar panels, wind turbines, and educational centers that showcase sustainable energy practices. The goal is to generate clean energy while also raising awareness about renewable technologies and their benefits.
- **Sustainability Park** - A space designed to promote and demonstrate sustainable living practices. This type of park may incorporate various elements such as community gardens, eco-friendly buildings, water conservation systems, and educational programs on sustainability. It aims to create an environment where visitors can learn about and engage in sustainable practices, fostering a community-oriented approach to environmental stewardship and resource management.

If I don't hear back before I see you, I'll check in with you at the meeting.

Mahalo.

Warm regards,

Carter
