Re: Professional Services for Fiscal Year 2025 - 2026

Dear Mr. Honma

EnvironMETeo Services, Inc. (EMET) is environmental consulting firm established in 1986. EMET would like to be considered to provide professional services for projects during the fiscal year 2025-2026 in the following categories:

- PR.2) Industrial Hygiene (Hazardous Materials Survey, Assessment & Planning)

EMET provides environmental services that include but are not limited to: environmental property (site) assessments, industrial hygiene services, asbestos survey, lead paint survey, hazardous materials identification and project management. Hazardous material mitigation plans, specifications, permit application preparation, source emission testing, and indoor/outdoor ambient air quality monitoring.

EMET's professional staff of twenty includes a Certified Industrial Hygienist (CIH), a registered Architect, State of Hawaii certified building inspectors, project monitors, management planners, project designers, EPA certified lead risk assessors, supervisors and project designers, industrial hygienists (IH), and

laboratory analysts in both identification and fiber counting. EMET has maintained an average size staff of 14 individuals over the past 5 years.

Our staff is experienced and trained in the use of a wide variety of environmental monitoring instrumentation including stationary source testing equipment, ambient air monitors, noise and indoor air quality instrumentation. Eight members of our source emission test team are certified by the State of Hawaii as visible emissions observers, which qualify our firm to certify smoke opacity, and fugitive dust readings for regulatory compliance.

EMET's comprehensive program of air quality monitoring and emissions testing include, but are not limited to, particulate matter, total suspended particulate, sulfur oxides, carbon dioxide, carbon monoxide, nitrogen oxides, hydrogen chloride, hydrogen sulfide, hydrocarbon, VOC's, BTEX, PNA's, cadmium, lead, mercury, heavy metals, asbestos, formaldehyde and bioaerosols. Ambient indoor and outdoor air pollution, industrial hygiene services, environmental site assessments (phase 1 and 2), environmental impact studies, state and PSD air permitting and air quality modeling.

EMET's analytical laboratory is a successful participant in the National Institute for Occupational Safety and Health (NIOSH) Proficiency Analytical Testing (PAT) program for airborne fiber analysis. EMET is also accredited by the National Institute of Standards and Technology (NIST), National Voluntary Laboratory Accreditation Program (NVLAP) for asbestos fiber analysis and identification, created under the (AHERA) Asbestos Hazard Emergency Response Act.

EMET has completed over 7000 facility site surveys for asbestos containing materials and lead paint and have developed and implemented over 300 Operation and Maintenance (O&M) programs relating to asbestos containing materials and lead paint exposure hazard. Our specialized experience includes 1995, 1998, 2013, 2016, 2019 and 2022 Department of Education AHERA inspection of its school facilities (in excess of 3000 buildings) and the 1998 Department of Education Lead Paint Investigation of all its elementary schools (1500 buildings).

EMET has an established track record demonstrating it is capable of performing high quality work, within specified time frames, in compliance with all performance schedules and budgets. Past and current contracts have had strict time restraints, which we have always met. Our staff is well familiar with State of Hawaii and U.S. Environmental Protection Agency testing procedures, protocols and regulatory requirements.

Company information (relating to SOQ submission):

Name of Firm: EnvironMETeo Services, Inc. (EMET)
Address of Firm: 94-520 Uke'e Street, Suite A
Waipio Gentry Business Park
Waipahu, Hawaii 96797

The above is EMET's principal place of business. EMET maintains no other offices at other locations

Point of Contact: Clifford How
Phone: 808.671.8383
Email: cliffhow@emetservices.com
Office Email: emet@emetservices.com

Age of Firm: established for 38 years (incorporated in 1986)
Office Staff: average over last 5 years - 14 staff

If you should have any questions regarding EMET's capabilities please call us at 808-671-8383, or email us at cliffhow@emetservices.com or emet@emetservices.com.

Respectfully,

Clifford How

STATEMENTS

Does your firm have any conflicts of interest in performing services for DAGS and/or the State of Hawaii? For example, do any key personnel have any membership on State boards, commissions, etc.?

No

If yes, list membership on State boards, commissions, etc. for all key personnel.

Does your firm have any objections to retaining specialty subconsultants (i.e., environmental, geotechnical, etc.) under prime contract?

No

Will your firm and subconsultants be willing to do the work under the City and County of Honolulu Express State Permits (ESP) process for the island of Oahu?

Yes

Section V
Certificate of Vendor Compliance

STATE OF HAWAII
STATE PROCUREMENT OFFICE

CERTIFICATE OF VENDOR COMPLIANCE

This document presents the compliance status of the vendor identified below on the issue date with respect to certificates required from the Hawaii Department of Taxation (DOTAX), the Internal Revenue Service, the Hawaii Department of Labor and Industrial Relations (DLIR), and the Hawaii Department of Commerce and Consumer Affairs (DCCA).

Vendor Name: ENVIRONMETEO SERVICES INC.

DBA/Trade Name: ENVIRONMETEO SERVICES INC.

Issue Date: 05/07/2025

Status: **Compliant**

Hawaii Tax#: 20381258-01
New Hawaii Tax#: GE-0419377152-01
FEIN/SSN#: XX-XXX9434
UI#: XXXXXX5951
DCCA FILE#: 64358

Status of Compliance for this Vendor on issue date:

Form	Department(s)	Status
A-6	Hawaii Department of Taxation	Compliant
8821	Internal Revenue Service	Compliant
COGS	Hawaii Department of Commerce & Consumer Affairs	Compliant
LIR27	Hawaii Department of Labor & Industrial Relations	Compliant

Status Legend:

Status	Description
Exempt	The entity is exempt from this requirement
Compliant	The entity is compliant with this requirement or the entity is in agreement with agency and actively working towards compliance
Pending	A status determination has not yet been made
Submitted	The entity has applied for the certificate but it is awaiting approval
Not Compliant	The entity is not in compliance with the requirement and should contact the issuing agency for more information

Section VI
EMET Certifications

United States Department of Commerce
National Institute of Standards and Technology

Certificate of Accreditation to ISO/IEC 17025:2017

NVLAP LAB CODE: 101807-0

EnvironMETeo Services Inc.
Waipahu, HI

is accredited by the National Voluntary Laboratory Accreditation Program for specific services,
listed on the Scope of Accreditation, for:

Asbestos Fiber Analysis

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017.
This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality
management system (refer to joint ISO-ILAC-IAF Communiqué on ISO/IEC 17025).

2024-07-01 through 2025-06-30

Effective Dates

A handwritten signature in black ink, which appears to read 'Thomas S. Lamm'. The signature is written in a cursive style.

IHPAT Round 241
Proficiency Testing Performance for Participant ID: PAT-101806

Page 1 of 2
Report Issue Date: 05/15/2025

Environmeteo Services, Inc.
Waipio Gentry Business Park
94-520 Uke'E St Ste A
Waipahu, HI 96797-4206

This report contains your organization's IHPAT Proficiency Analytical Testing results for **IHPAT Round 241**. It is the participant's responsibility to thoroughly review the information in this final report and to immediately contact the AIHA Proficiency Analytical Testing Programs, in writing, if any errors are found.

IHPAT Results

The final report is comprised of two sections relating to IHPAT Round 241. The first section contains your organization's results listed per analyte, per sample. The second section contains your current performance and performance from the two previous rounds, respectively (where applicable). Summary results for all participants for IHPAT Round 241 are located in a separate report.

Testing Results for IHPAT Round 241

This part of the report contains your organization's results listed per analyte, per sample.

Contaminant	Unit	#	Result	Ref. Value	Lower Limit	Upper Limit	z-Score	Rating
Asbestos (ASB)	f/mm ²	1	153	194	103	313	-1.2	A
	f/mm ²	2	318	356	199	557	-0.6	A
	f/mm ²	3	394	454	222	767	-0.7	A
	f/mm ²	4	99	86	47	136	0.9	A

Statistical Analysis Interpretation Note:

Reference value is the mean of the reference group.

Lower limit = reference value - 3 standard deviations; Upper limit = reference value + 3 standard deviations

z-Score = (reported result - reference value)/standard deviation. Note: z-Scores indicate how far a particular score is away from the mean. A - Acceptable* Analysis; U - Unacceptable Analysis; E - Excused Absence

Fiber data are positively skewed therefore transformations are used to obtain approximately normal distributions. Both the assigned values and acceptance limits are based on consensus of the reference group.

*The acceptability of reported results is based on upper and lower acceptance limits. A reported result may appear acceptable/unacceptable according to z-Score, but be identified as an outlier based upon the acceptance limits. Any non-participation or non-reporting of PAT data will result in unacceptable results (see PAT Programs Participation Policies, Section 2.1.6.2.).

Measurement uncertainty of any assigned value is also available on the respective certificate of analysis for the round.

Technical Comment - Organic Solvents: To accommodate a potential bi-modal distribution between laboratories using carbon disulfide vs. those using carbon disulfide with co-solvents for IPA analysis, PAT Programs has expanded the acceptance range based on the standard deviation from the carbon disulfide reference group participants. The reference mean was derived from the entire reference group.

Overall Performance Summary Concluding with IHPAT Round 241

The following table contains your organization's current and two previous test rounds performance respectively (where applicable). For more information in regard to the determination of proficiency, please visit: www.aihapat.org.

Analyte Class	Round	Round Score	Round Performance	Proficiency Status - Three Round Score
Asbestos	239-R	2/4	FAIL	
	240	3/4	PASS	
	241	4/4	PASS	PROFICIENT

Interpretation Notes:

The denominators represent the total number of samples analyzed. The numerators represent the number of acceptable results.

Pass: Round Score greater than or equal to 75%

Fail: Round Score less than 75%

P - Proficient; NP - Non-proficient; I - Indeterminate (not enough rounds to determine proficiency)

A participant is rated proficient for the applicable IHPAT analyte group if the participant has a passing score for the applicable IHPAT analyte group in two (2) of the last three (3) consecutive PT rounds. A participant is rated non-proficient for the applicable PT analyte group if the participant has failing scores for the associated PT analyte group in two (2) of the last three (3) consecutive PT rounds.

Additional information on the following items are available in the Industrial Hygiene Scheme Plan:

Procedures used to statistically analyze the data, establish the assigned value and standard deviation for proficiency assessment, or other criteria for evaluation; details of the metrological traceability and measurement uncertainty of the assigned value; information about design and implementation of PT scheme. The Industrial Hygiene Scheme Plan is available in the PAT Portal. Measurement uncertainty of any assigned value is also available on the respective certificate of analysis for the round.

Participants shall not describe their proficiency status in a manner that implies accreditation, certification or variations thereof. PAT results pertain only to the participant organization at the location listed on this results report. AIHA PAT Programs makes every effort to ensure that individual participant results are kept confidential and are not made public. Round results are only released to the participant and those entities requiring this information for accreditation, regulatory and contract purposes. New participants are made aware of the arrangement in advance of participation and consent is sought prior to the release of records for participants. PAT reports may not be reproduced or distributed unless copied in its entirety.

IHPAT samples are generated, verified, packaged, and shipped by RTI International under contract with AIHA Proficiency Analytical Testing Programs. Unless otherwise noted, sample homogeneity and stability criteria were satisfied for all samples.
