Re: Professional Services for Fiscal Year 2024 - 2025

Dear Ms. Kunz

EnvironMETeo Services, Inc. (EMET) is environmental consulting firm established in 1986. EMET would like to be considered to provide professional services for projects during the fiscal year 2024-2025 in the following categories:

- OH.1) Community Planning (Environmental Assessment)
- OH.4) Construction Management/Inspector

EMET provides environmental services that include but are not limited to: environmental property (site) assessments, industrial hygiene services, asbestos survey, lead paint survey, hazardous materials identification and project management. Hazardous material mitigation plans, specifications, permit application preparation, source emission testing, and indoor/outdoor ambient air quality monitoring.

EMET's professional staff of twenty includes a Certified Industrial Hygienist (CIH), a registered Architect, State of Hawaii certified building inspectors, project monitors, management planners, project designers, EPA certified lead risk

---

assessors, supervisors and project designers, industrial hygienists (IH), and laboratory analysts in both identification and fiber counting. EMET has maintained an average size staff of 14 individuals over the past 5 years.

Our staff is experienced and trained in the use of a wide variety of environmental monitoring instrumentation including stationary source testing equipment, ambient air monitors, noise and indoor air quality instrumentation. Eight members of our source emission test team are certified by the State of Hawaii as visible emissions observers, which qualify our firm to certify smoke opacity, and fugitive dust readings for regulatory compliance.

EMET's comprehensive program of air quality monitoring and emissions testing include, but are not limited to, particulate matter, total suspended particulate, sulfur oxides, carbon dioxide, carbon monoxide, nitrogen oxides, hydrogen chloride, hydrogen sulfide, hydrocarbon, VOC's, BTEX, PNA's, cadmium, lead, mercury, heavy metals, asbestos, formaldehyde and bioaerosols. Ambient indoor and outdoor air pollution, industrial hygiene services, environmental site assessments (phase 1 and 2), environmental impact studies, state and PSD air permitting and air quality modeling.

EMET's analytical laboratory is a successful participant in the National Institute for Occupational Safety and Health (NIOSH) Proficiency Analytical Testing (PAT) program for airborne fiber analysis. EMET is also accredited by the National Institute of Standards and Technology (NIST), National Voluntary Laboratory Accreditation Program (NVLAP) for asbestos fiber analysis and identification, created under the (AHERA) Asbestos Hazard Emergency Response Act.

EMET has completed over 7000 facility site surveys for asbestos containing materials and lead paint and have developed and implemented over 300 Operation and Maintenance (O&M) programs relating to asbestos containing materials and lead paint exposure hazard. Our specialized experience includes 1995, 1998, 2013, 2016 and 2019 Department of Education AHERA inspection of its school facilities (in excess of 3000 buildings) and the 1998 Department of Education Lead Paint Investigation of all its elementary schools (1500 buildings).

EMET has an established track record demonstrating it is capable of performing high quality work, within specified time frames, in compliance with all performance schedules and budgets. Past and current contracts have had strict time restraints, which we have always met. Our staff is well familiar with State of Hawaii and U.S. Environmental Protection Agency testing procedures, protocols and regulatory requirements.

Company information (relating to SOQ submission):

Name of Firm: EnvironMETeo Services, Inc. (EMET)  
Address of Firm: 94-520 Uke'e Street, Suite A  
Waipio Gentry Business Park  
Waipahu, Hawaii 96797

The above is EMET's principal place of business. EMET maintains no other offices at other locations

Point of Contact: Clifford How  
Phone: 808.671.8383  
Email: [cliffhow@emetservices.com](mailto:cliffhow@emetservices.com)  
Office Email: [emet@emetservices.com](mailto:emet@emetservices.com)

Age of Firm: established for 36 years (incorporated in 1986)  
Office Staff: average over last 5 years - 14 staff

If you should have any questions regarding EMET's capabilities please call us at (808) 671-8383, or email us at [cliffhow@emetservices.com](mailto:cliffhow@emetservices.com) or [emet@emetservices.com](mailto:emet@emetservices.com).

**Explain firm's individual project assignment, project management structure, project execution (work flow and responsibilities) and quality control process.** In the event the spaces provided on this form are not sufficient for entries, or if you wish to furnish additional information, it may be inserted here or on separate sheets, with appropriate references.

EMET provides environmental services that include but are not limited to: environmental property (site) assessments, industrial hygiene services, asbestos survey, lead paint survey, hazardous materials identification and project management. Hazardous material mitigation plans, specifications, permit application preparation, source emission testing, and indoor/outdoor ambient air quality monitoring.

EMET's professional staff of twenty includes a Certified Industrial Hygienist (CIH), a registered Architect, State of Hawaii certified building inspectors, project monitors, management planners, project designers, EPA certified lead risk assessors, supervisors and project designers, industrial hygienists (IH), and laboratory analysts in both identification and fiber counting.

Our staff is experienced and trained in the use of a wide variety of environmental monitoring instrumentation including stationary source testing equipment, ambient air monitors, noise and indoor air quality instrumentation. Eight members of our source emission test team are certified by the State of Hawaii as visible emissions observers, which qualify our firm to certify smoke opacity, and fugitive dust readings for regulatory compliance.

EMET's comprehensive program of air quality monitoring and emissions testing include, but are not limited to, particulate matter, total suspended particulate, sulfur oxides, carbon dioxide, carbon monoxide, nitrogen oxides, hydrogen chloride, hydrogen sulfide, hydrocarbon, VOC's, BTEX, PNA's, cadmium, lead, mercury, heavy metals, asbestos, formaldehyde and bioaerosols. Ambient indoor and outdoor air pollution, industrial hygiene services, environmental site assessments (phase 1 and 2), environmental impact studies, state and PSD air permitting and air quality modeling.

EMET's analytical laboratory is a successful participant in the National Institute for Occupational Safety and Health (NIOSH) Proficiency Analytical Testing (PAT) program for airborne fiber analysis. EMET is also accredited by the National Institute of Standards and Technology (NIST), National Voluntary Laboratory Accreditation Program (NVLAP) for asbestos fiber analysis and identification, created under the (AHERA)Asbestos Hazard Emergency Response Act.

EMET has completed over 8000 facility site surveys for asbestos containing materials and lead paint and have developed and implemented over 300 Operation and Maintenance (O&M) programs relating to asbestos containing materials and lead paint exposure hazard. Our specialized experience includes 1995, 1998, 2013, 2016 and 2019 Department of Education AHERA inspection of its school facilities (in excess of 3000 buildings) and the 1998 Department of Education Lead Paint Investigation of all its elementary schools (1500 buildings).

EMET has an established track record demonstrating it is capable of performing high quality work, within specified time frames, in compliance with all performance schedules and budgets. Past and current contracts have had strict time restraints, which we have always met. Our staff is well familiar with State of Hawaii and U.S. Environmental Protection Agency testing procedures, protocols and regulatory requirements.

IHPAT Round 237  
Proficiency Testing Performance for Participant ID: PAT-101806

Page 1 of 2  
Report Issue Date: 05/15/2024

Environmeteo Services, Inc.  
Waipio Gentry Business Park  
94-520 Uke'E St Ste A  
Waipahu, HI 96797-4206

This report contains your organization's IHPAT Proficiency Analytical Testing results for IHPAT Round 237. It is the participant's responsibility to thoroughly review the information in this final report and to immediately contact the AIHA Proficiency Analytical Testing Programs, in writing, if any errors are found.

**IHPAT Results**

The final report is comprised of two sections relating to IHPAT Round 237. The first section contains your organization's results listed per analyte, per sample. The second section contains your current performance and performance from the two previous rounds, respectively (where applicable). Summary results for all participants for IHPAT Round 237 are located in a separate report.

**Testing Results for IHPAT Round 237**

This part of the report contains your organization's results listed per analyte, per sample.

Contaminant	Unit	#	Result	Ref. Value	Lower Limit	Upper Limit	z-Score	Rating
Asbestos (ASB)	f/mm <sup>2</sup>	1	281	457	251	726	-2.2	A
	f/mm <sup>2</sup>	2	232	190	103	303	1.3	A
	f/mm <sup>2</sup>	3	74	191	94	323	-3.1	U
	f/mm <sup>2</sup>	4	92	93	50	150	-0.1	A

**Statistical Analysis Interpretation Note:**

Reference value is the mean of the reference group.

Lower limit = reference value - 3 standard deviations; Upper limit = reference value + 3 standard deviations

z-Score = (reported result - reference value)/standard deviation. Note: z-Scores indicate how far a particular score is away from the mean. A - Acceptable\*

Analysis; U - Unacceptable Analysis; E - Excused Absence

Fiber data are positively skewed therefore transformations are used to obtain approximately normal distributions. Both the assigned values and acceptance limits are based on consensus of the reference group.

\*The acceptability of reported results is based on upper and lower acceptance limits. A reported result may appear acceptable/unacceptable according to z-Score, but be identified as an outlier based upon the acceptance limits. Any non-participation or non-reporting of PAT data will result in unacceptable results (see PAT Programs Participation Policies, Section 2.1.6.2.).

Measurement uncertainty of any assigned value is also available on the respective certificate of analysis for the round.

Technical Comment: None

**Overall Performance Summary Concluding with IHPAT Round 237**

The following table contains your organization's current and two previous test rounds performance respectively (where applicable). For more information in regard to the determination of proficiency, please visit: [www.aihapat.org](http://www.aihapat.org).

Analyte Class	Round	Round Score	Round Performance	Proficiency Status - Three Round Score
Asbestos	235-R	3/4	PASS	
	236	3/4	PASS	
	237	3/4	PASS	PROFICIENT

**Interpretation Notes:**

The denominators represent the total number of samples analyzed. The numerators represent the number of acceptable results.

Pass: Round Score greater than or equal to 75%

Fail: Round Score less than 75%

P - Proficient; NP - Non-proficient; I - Indeterminate (not enough rounds to determine proficiency)

A participant is rated proficient for the applicable IHPAT analyte group if the participant has a passing score for the applicable IHPAT analyte group in two (2) of the last three (3) consecutive PT rounds. A participant is rated non-proficient for the applicable PT analyte group if the participant has failing scores for the associated PT analyte group in two (2) of the last three (3) consecutive PT rounds.

**Additional information on the following items are available in the IHPAT Scheme Plan:**

Procedures used to statistically analyze the data, establish the assigned value and standard deviation for proficiency assessment, or other criteria for evaluation; details of the metrological traceability and measurement uncertainty of the assigned value; information about design and implementation of PT scheme. The Industrial Hygiene Scheme Plan is available in the PAT Portal. Measurement uncertainty of any assigned value is also available on the respective certificate of analysis for the round.

Participants shall not describe their proficiency status in a manner that implies accreditation, certification or variations thereof. PAT results pertain only to the participant organization at the location listed on this results report. AIHA PAT Programs makes every effort to ensure that individual participant results are kept confidential and are not made public. Round results are only released to the participant and those entities requiring this information for accreditation, regulatory and contract purposes. New participants are made aware of the arrangement in advance of participation and consent is sought prior to the release of records for participants. PAT reports may not be reproduced or distributed unless copied in its entirety.

IHPAT samples are generated, verified, packaged, and shipped by RTI International under contract with AIHA Proficiency Analytical Testing Programs. Unless otherwise noted, sample homogeneity and stability criteria were satisfied for all samples.

Subject: Lead-Based Paint Activities Firm Certification for EnvironMETeo Services,  
Inc.

Your Lead-Based Paint Activities Firm certification packet has been received and processed. Your certification number is **PBF-0024** and is valid until **June 19, 2027**. You are now certified with the Hawaii State Department of Health to perform lead-based paint activities pursuant to Hawaii Administrative Rules, Chapter 11-41.

To maintain certification as a firm, please be sure to apply for re-certification prior to the expiration date.

Enclosed is the receipt for the \$400.00 certification fee.

Thank you for your cooperation. Should you have any questions or require additional information, please contact Mr. Reuben L. Bilan at (808) 586-5800.

FOR DIRECTOR OF HEALTH

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON D C 20460

March 29, 2024

Clifford How  
Environmeteo Services, Inc  
94-520 Ukee Street, Suite A  
Waipahu, HI 96797

OFFICE OF CHEMICAL SAFETY  
4200 RESERVE DRIVE, WASHINGTON, DC 20460

Dear Clifford How:

Thank you for applying to the U.S. Environmental Protection Agency (EPA) for accreditation to provide Renovation, Repair and Painting training. I am pleased to inform you that pursuant to 40 CFR Part 745 Subpart E, your training program is accredited to offer the **Renovator Initial and Refresher courses in English**.

This applies to all States, Territories, and Indian Tribes that do not have an authorized Renovation, Repair and Painting Program. Your certificates are enclosed.

The accreditations **expire on March 03, 2028**. However, if any State, Territory, or Indian Tribe obtains program authorization at any time during the term of your accreditation, your accreditation will no longer be valid in the newly authorized jurisdiction.

Your EPA training program accreditation for the above listed course is subject to the following:

- 1) EPA notification prior to and following completion of training. Registered users can provide this notice electronically using the Agency's Central Data Exchange (CDX). To register call the CDX help line at 1-888-890-1995 and ask for a customer retrieval key.
  - 2) Approval pertains only to training individuals for purposes of obtaining certification to conduct Renovation, Repair, and Painting activities pursuant to Section 402 of the Toxic Substances Control Act (TSCA) (15 U.S.C. 2682).
  - 3) EPA accreditation does not mean that a State, Territory or Indian Tribe with its own accreditation program must accept or recognize an EPA accreditation. Individual States, Territories, and Indian Tribes, whether authorized or not, have the right to accept or reject any accreditation under their own authority. Please be aware that your EPA accreditation does not relieve you of any obligations that you may otherwise have to any authorized or unauthorized State, Territory, or Indian tribe to obtain licensure or accreditation from that state or Indian tribe under its statutory or regulatory requirements relating to renovation, repair and painting activities.
  - 4) In advertising the EPA accreditation, training programs must indicate clearly that the courses are approved for purposes of certification under Section 402 of TSCA for the respective discipline. Failure to accurately state EPA accreditation conditions could result in EPA suspending or withdrawing accreditation.
  - 5) EPA may conduct audits and/or inspections to ensure continued compliance with regulatory standards, and may revoke or suspend its accreditation if subsequent alterations or deviations result with the training program no longer meeting the standards found at 40 CFR Part 745, Subpart E.
  - 6) Accredited training programs, which have certified that EPA-recommended model training materials will be used to conduct their renovation, repair and painting courses, must use the most current version of the EPA-recommended model training materials. Once a revised EPA model course has been finalized, previous versions are no longer valid EPA-recommended model training materials.
- If you have questions or need assistance, please contact the Regional Lead Coordinator, Angela Baranco, of the EPA Region 9 staff at 415-947-4262 and refer to **Application ID numbers T905685 and T905688**. Congratulations, and thank you for your interest in providing accredited lead-based paint training.

Sincerely,

A handwritten signature in black ink, appearing to read "Adrienne Priselac".

Adrienne Priselac, Deputy Director  
Land, Chemicals & Redevelopment Division
