Ms. Susan Kunz, Administrator
Housing and Community Development
County of Hawai'i
1990 Kino'ole Street, Suite 102
Hilo, Hawai'i 96720

Re: Notice to Providers of Professional Services

Dear Ms. Kunz:

The Limtiaco Consulting Group, Inc. (TLCG) would like to be considered for providing professional services related to projects within:

- **Category OH.4) Construction Management/Inspector**

A completed Federal Standard Form 330 describing our firm's capabilities is provided. Included is a list of five references of previous clients who can be contacted for an evaluation of our professional experience and past performance.

We appreciate the opportunity to submit our firm's qualifications and this letter of interest. We look forward to the selection process and would like to take this opportunity to wish you and your staff success in the completion of your Capital Improvement Projects for this fiscal year and subsequent years. If there are any questions or if additional information is required, please do not hesitate to call us at (808) 596-7790.

Very truly yours,
The Limtiaco Consulting Group, Inc.

Ian Y. Arakaki, P.E.
Principal

19. RELEVANT PROJECTS

(1) TITLE AND LOCATION <i>(City and State)</i>	(2) YEAR COMPLETED	
	PROFESSIONAL SERVICES	CONSTRUCTION (If Applicable)
a. (1) Mauna Lani Disk Filter Upgrade Waimea, Hawai'i Island (3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE Construction Manager for a new disc filtration system at the Mauna Lani Wastewater Treatment Facility to discharge reuse water into existing injection wells. Design included new effluent submersible pumps; new polymer dosing system and underground vault; yard piping for new filtration system, backwash system, effluent pump station, service water, and connection into the existing injection wells; pad foundations; access stairs, walkways, and gate; grading and drainage improvements; and electrical and SCADA improvements. Project duties included weekly project coordination meetings, construction schedule monitoring, project file maintenance, site observation visits, and pre-final inspection.	2022	2022
b. (1) West O'ahu Sewer System Improvements and O'ahu Cesspool Assessments West O'ahu, Hawai'i (3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE Associate Principal Construction Manager for the West O'ahu Sewer System Improvements project and the O'ahu Cesspool Assessments project. The improvement project includes sewer repairs and replacements to meet City and County of Honolulu standards in Wai'anae and Princess Kahanu Estates. The assessment project consists of assessments of existing cesspools in Nanakuli and Waimanalo for possible sewer connection or replacement with an IWS in accordance with EPA mandate. Duties include review of plans and specifications, construction schedule, quality control program, and safety plan; construction monitoring; investigating damage claims and complaints; conducting weekly progress meetings with contractor; coordination of owner-engineer-contractor jobsite meetings; and establishment of final closeout procedures and final punch list.	N/A	On-going
c. (1) Construction Management Services in the Kaka'ako Community Development District Honolulu, Hawai'i (3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE Associate Principal Construction Manager to provide construction management services for a permanent pedestrian crosswalk and traffic safety improvements in the Kaka'ako area and landscape improvements for the Kolowalu Park – Dog Park. Crosswalk improvements include construction of a new crosswalk and demolition of existing curbs, sidewalks, and pavement; construction of a raised center median and pedestrian refuge; installation of pavement marking, signage, and rapid flash beacons; and repair of an existing drain inlet. Landscape improvements include construction of a dog park, including removal of existing trees; repurposing of irrigation; and construction of water access facilities, fencing, lighting, signage, and dog play amenities and seating. Project duties include review of plans and specifications, construction schedule, quality control program, and safety plan; construction monitoring; investigating damage claims and complaints; conducting weekly progress meetings with contractor; and establishment of final closeout procedures and final punch list.	N/A	On-going
d. (1) Waiahole Valley Potable Water System Select Repairs Kane'ohe, Hawai'i (3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE Associate Principal Construction Manager for repairs to the Waiahole Valley Potable Water System due to heavy rains and flooding. Emergency work included clearing debris; removing boulder embankment; building up perimeter rock wall; restoring wellsite grounds, electrical and mechanical underground lines, shoulder, road and well site, and chain link fence; repairing culvert under bridge; replacement of temporary water line; and tree removal. Second phase of work includes expansion of the existing control building including electrical and mechanical control systems, well pump replacement and well discharge piping replacement, booster pump system repairs, steel tank reservoir repairs and water sampling station, portable generator, temporary erosion and sedimentation control, temporary potable water service, and construction phasing. Project duties include weekly project coordination meetings, construction schedule monitoring, and pre-final inspection.	N/A	On-going

	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE [x] Check if project performed with current firm Structural Engineer to provide construction management services for various sewer reconstruction projects within the Ala Moana Tributary Basin. Improvements include installation of cured-in-place pipe lining in existing sewer lines, construction of new sewer lines by open excavation, installation of new manholes, manhole rehabilitation, reconnection of laterals, and relocation of existing water mains. Duties include daily jobsite inspections and reports; weekly meetings; processing contractor submittals, change orders, and contractor's application for payment; and project documentation and filing.		
c.	Waiahole Valley Potable Water System Select Repairs Kane'ohe, Hawai'i	N/A	On-going
	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE [x] Check if project performed with current firm Structural Engineer for repairs to the Waiahole Valley Potable Water System due to heavy rains and flooding. Second phase of work includes expansion of the existing control building including electrical and mechanical control systems, well pump replacement and well discharge piping replacement, booster pump system repairs, steel tank reservoir repairs and water sampling station, portable generator, temporary erosion and sedimentation control, temporary potable water service, and construction phasing. Project duties include weekly project coordination meetings, construction schedule monitoring, and pre-final inspection.		
d.	Construction Management, Planning, and Permitting Services for the Sand Island WWTP Secondary Treatment – 20 MGD Capacity and Maintenance Building, Septage, and Site Improvements Honolulu, Hawai'i	On-going	
	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE [x] Check if project performed with current firm Structural Engineer for the construction of various wastewater treatment upgrades and support facilities for the Sand Island WWTP, including demolition of existing facilities; construction of a three-story maintenance building, septage facility, pump station, membrane bioreactor facility, solids thickening building, and odor control and stormwater detention basins; and site improvements, including roadways, driveways, buildings, parking lots, sidewalks, and drainage system. Duties include stormwater inspections to assess proper implementation of stormwater Best Management Practices (BMPs) and general compliance with the NPDES Construction Storm Water General Permit and the City and County of Honolulu Rules Relating to Water Quality.		
e.	Lead Service Line Inventory, Water Quality Study, and Related Technical Services Island-wide, O'ahu, Hawai'i	On-going	
	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE [x] Check if project performed with current firm Structural Engineer to assist the BWS in their efforts to bring operations in compliance with the revised EPA Lead and Copper Rule. Duties preparation of a lead service line (LSL) inventory to identify and catalog the presence of hazardous materials in the BWS water distribution system; preparation of a list of sampling sites for each BWS water system to include residential structures, schools, and licensed child care facilities; conducting site investigations to assist with the preparation of a lead service line (LSL) inventory to identify and catalog the presence of hazardous materials in the BWS water distribution system.

		PROFESSIONAL SERVICES	CONSTRUCTION (If Applicable)
a.	Construction Management Services for Papakolea Sewer System Improvements Honolulu, Hawai'i	N/A	On-going
	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Construction Inspector to provide construction management services for slope stabilization and general site improvements in Papakolea, Kewalo, and Kalawahine Subdivisions. Project duties include review of plans, specifications, and construction schedule; jobsite inspections and reports; processing contractor submittals, change orders, and contractor's application for payment; and project documentation and filing.		
b.	West O'ahu Sewer System Improvements and O'ahu Cesspool Assessments West O'ahu, Hawai'i	N/A	On-going
	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Construction Inspector for the West O'ahu Sewer System Improvements project and the O'ahu Cesspool Assessments project. The improvement project includes sewer repairs and replacements to meet City and County of Honolulu standards in Wai'anae and Princess Kahanu Estates. The assessment project consists of assessments of existing cesspools in Nanakuli and Waimanalo for possible sewer connection or replacement with an IWS in accordance with EPA mandate. Duties include daily jobsite inspections and reports; weekly meetings; processing contractor submittals, change orders, and contractor's application for payment; and project documentation and filing.		
c.	Construction Management Services for Sewer I/I Relief and Rehabilitation Projects – Ala Moana Basin Honolulu, Hawai'i	N/A	On-going
	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Construction Inspector to provide construction management services for various sewer reconstruction projects within the Ala Moana Tributary Basin. Improvements include installation of cured-in-place pipe lining in existing sewer lines, construction of new sewer lines by open excavation, installation of new manholes, manhole rehabilitation, reconnection of laterals, and relocation of existing water mains. Project duties include daily jobsite inspections and reports; weekly meetings; processing contractor submittals, change orders, and contractor's application for payment; and project documentation and filing.		
d.	Civil Engineering, Construction Management and Related Staff Services for the Department of Agriculture Statewide, Hawai'i	2021	2021
	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Construction Inspector for the Department of Agriculture's Lower Hamakua Ditch Watershed, Pa'aulo Distribution Improvements project. The project scope included the installation of approximately 5,850 linear feet (LF) of 4-inch PVC pipe irrigation main, including all required fittings and fixtures, 20 service lateral connections, and installation of two pressure reducing valve (PRV) units. Duties included conducting jobsite meetings, reviewing construction submittals, monitoring the work of the contractor, resolving conflicts, and overseeing final testing and inspection.		
e.	Construction Management Services for the Wahiawa Wastewater Treatment Plant – Recycled Water System Improvements Wahiawa, Hawai'i	N/A	On-going
	(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Construction Inspector for the construction of recycled water system improvements at the Wahiawa WWTP. Improvements include repurposing the existing R-1 pump station to convey up to 6.5 MGD to ADC lands, construction of a concrete wetwell cover, installation of a new electrical lineup, and replacement of existing instrumentation and control system. Project duties include daily jobsite inspections and reports; weekly meetings; processing contractor submittals, change orders, and contractor's application for payment; and project documentation and filing.

---	--	---

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

New disk filter, access platform, backwash system, and filter piping to the injection wells

Design Fee - \$521,000
Construction Cost - \$1,550,000

Scope

Civil design and construction administration services for a new disk filtration system at the Mauna Lani Wastewater Treatment Plant (WWTP) with a capacity of approximately 500,000 gallons per day.

Relevant Project Elements

- ✓ Construction Documents
- ✓ Permit Applications
- ✓ Construction Administration

Design

TLCG was responsible for the design of a new filtration system to remove algae from the treatment stream and discharge the reuse water into existing injection wells located at the WWTP. Design components included new effluent submersible pumps; new polymer dosing system, underground vault, air relief valve, and eyewash shower; yard piping for the new filtration system, backwash system, effluent pump station, service water, and connection into the existing injection wells; pad foundations required to support the new filtration tank, pumps, and auxiliary components; access stairs and maintenance platform; access walkways and new gate; grading and drainage improvements; and electrical and SCADA improvements. Duties also included the preparation of a Special Management Area Use exemption letter, attendance at public hearings, and services during bidding and construction.

Construction Administration

Services provided during the construction phase included: conducting weekly owner-contractor meetings to address issues such as schedules, requests for information, construction submittals, shop drawings, and payment requests; monitoring the construction schedule and assisting the contractor in identifying long lead items which would adversely affect the schedule and help address any significant delays; reviewing and monitoring each payment request and construction modifications; maintaining project construction and administration files; conducting daily site observation visits, as needed; coordinating with City inspectors; conducting the pre-final inspection with the contractor; preparing record drawings from the contractor's marked-up as-built construction set; and coordinating with the electrical consultant to perform startup and testing of controls and SCADA systems.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

Wire mesh slope stabilization system

Fee - \$1,767,000
Construction Cost - \$9,200,000

Scope

Construction management services for the Papakolea Subdivision Sewer Improvements project and the Auwaiolimu Slope Stabilization and Sewer Lines project.

[Relevant Project Elements](#)
 ✓ [Construction Management](#)

The proposed improvements for the Papakolea Subdivision Sewer Improvements project consist of installation of approximately 3,400 linear feet (LF) of 6- and 8-inch sewer lines by open trench, epoxy lining sewer manholes, installation of new manholes, and installation of cured-in-place pipe (CIPP) lining in 840 LF of existing 8-inch sewer lines.

The proposed rockfall mitigation solutions for the Auwaiolimu Slope Stabilization and Sewer Lines project include the installation of shotcrete fill for 4,000 LF of rockbolt anchoring, 26,700 square feet (SF) of anchored wire mesh, and 6,600 SF of permanent erosion control matting. Sewer improvements include installation of a temporary bypass and 600 LF of 6-inch PVC sewer line by open trench. 24-hour traffic control measures will be in place during construction.

TLCG is currently performing the following duties:

- Review the design drawings, plans, and specifications for constructability of the project and compliance with applicable government agency requirements
- Review contractor's schedule, jobsite procedures, quality control program, and safety plan
- Perform daily jobsite inspections to verify the work is being accomplished in accordance with the contract

documents and notify the owner upon the discovery of any defects and deficiencies in the work

- Complete daily reports which include information on the contractor's labor, equipment, and material usage as well as any significant incidents
- Investigate and take appropriate action on damage claims and complaints
- Conduct weekly meetings with the contractor to discuss construction progress, safety program, quality issues, submittal review status, material status, information requests, cost proposal requests, and design issues
- Coordinate site observations and jobsite meetings with owner, engineer, and contractor
- Process contractor submittals including requests for information, shop drawings, product literature and samples, test reports, and certificates
- Process change orders and contractor's application for payment and recommend for acceptance
- Maintain accurate and comprehensive project documents and jobsite correspondence
- Prior to completion of work and release of final payment, establish final closeout procedures and final punch list and confirm required inspections by government agencies and utility companies are completed

Project Status: Construction expected to be completed in 2024.

Pre-construction prior to sewer manhole rehabilitation and sewer line replacement

Fee - \$805,000
Construction Cost - \$7,219,000

Scope

Construction management services for sewer repairs and replacements in Wai'anae and Princess Kahanu Estates and assessments of existing cesspools in Nanakuli and Waimanalo.

Relevant Project Elements

√ Construction Management

TLCG is responsible for providing construction management services for the West O'ahu Sewer System Improvements project, which consists of sewer repairs and replacements to meet City and County of Honolulu standards in Wai'anae and Princess Kahanu Estates. Construction management services will also be provided for the O'ahu Cesspool Assessments project, which consists of assessments of existing cesspools in Nanakuli and Waimanalo for possible sewer connection or replacement with an individual wastewater system (IWS) as mandated by the U.S. Environmental Protection Agency (EPA).

TLCG is currently performing the following duties:

- Review the design drawings, plans, and specifications for constructability of the project and compliance with applicable government agency requirements
- Review contractor's schedule, jobsite procedures, quality control program, and safety plan
- Perform daily jobsite inspections to verify the work is being accomplished in accordance with the contract documents and notify the owner upon the discovery of any defects and deficiencies in the work

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

Existing crosswalk at Queen St/Waimanu St intersection

Fee - \$246,000
Construction Cost - \$1,441,000

Scope

Construction management services for a permanent pedestrian crosswalk and traffic safety improvements in the Kaka'ako area and landscape improvements for the Kolowalu Park - Dog Park.

Relevant Project Elements
 ✓ Construction Management

TLCG is responsible for providing construction management services for the Queen Street/Waimanu Street Crosswalk Improvements project, which consists of construction of a new crosswalk and demolition of existing curbs, sidewalks, and pavement; construction of a raised center median and pedestrian refuge; installation of pavement marking, signage, and rapid flash beacons; and repair of an existing drain inlet. Construction management services will also be provided for the Kolowalu Park – Bark Park Landscape Improvements project, which consists of construction of a dog park, including removal of existing trees; repurposing of irrigation; and construction of water access facilities, fencing, lighting, signage, and dog play amenities and seating. The project requires best practices for stormwater management and traffic control.

TLCG is currently performing the following duties:

- Review contractor's schedule, jobsite procedures, quality control program, and safety plan
- Perform daily jobsite inspections to verify the work is being accomplished in accordance with the contract documents and notify the owner upon the discovery of any defects and deficiencies in the work

- Complete daily reports which include information on the contractor's labor, equipment, and material usage as well as any significant incidents

a. PROJECT OWNER State of Hawai'i Department of Agriculture	b. POINT OF CONTACT NAME Mr. Colyn Lee, AIA	c. POINT OF CONTACT TELEPHONE NUMBER (808) 738-7684
---	---	---

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

New irrigation pumps at Kahuku Agricultural Park

*Design Fee - \$448,000
Construction Cost - \$3,328,000*

Scope

Civil design services for the construction of a new office and maintenance building at Waimanalo Baseyard and sinkhole repair at the pump station building in the Kahuku Agricultural Park, both owned by the Department of Agriculture.

Relevant Project Elements

- √ Construction Documents
- √ Permit Applications
- √ Construction Management

TLCG is currently providing civil design services for improvements at two properties owned by the Department of Agriculture: Waimanalo Baseyard and Kahuku Agricultural Park.

Waimanalo Baseyard

Site improvements at the Waimanalo Baseyard include abandonment of existing cesspool, site grading to accommodate the new building and divert stormwater to grassed areas on-site, new asphalt concrete parking lot with ADA-compliant parking stall, new Individual Wastewater System (IWS) consisting of septic tank and leach field, and temporary BMPs in accordance with the City's revised Water Quality Rules. Design services include preparation of construction drawings, technical specifications, cost estimate, and drainage report; coordination with design team; SHPD consultation for historical significance in accordance with HRS 6E; and services during bidding and construction.

Construction management services will include site inspections and attendance at jobsite meetings, monitoring construction schedule and identifying long lead items which may adversely impact the construction schedule, review of all monthly progress payment requests and construction modifications, conducting final inspection, and preparing record drawings from the contractor's marked-up as-built construction set.

Kahuku Pump Station Building

TLCG is providing civil design services to repair a sinkhole located immediately outside of the pump station building in the Kahuku Agricultural Park and construction management services for pump station building improvements. Duties include visual assessment of sinkhole subsurface condition, design of site improvements for sinkhole repair, coordination with design team, SHPD consultation for historical significance in accordance with HRS 6E, and services during bidding and construction.

The existing pump station pumps water to a 100,000-gallon tank which is the source of irrigation water for several agricultural lots. Proposed improvements consist of replacement of the roof, siding, hoist crane, and pumps. Construction management services include site inspections and attendance at jobsite meetings, monitoring construction schedule and identifying long lead items which may adversely impact the construction schedule, review of monthly progress payment requests and construction modifications, conducting final inspection, and preparing record drawings from the contractor's as-built construction set.

Project Status: Final Design for baseyard improvements submitted. Preliminary Design for sinkhole repair submitted. Construction of the pump station building is expected to be completed in 2024.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

Reconstructed fencing and access road to the pump station

*Fee - \$586,000
Construction Cost - \$2,625,000*

Scope

Construction management services for repairs to the Waiahole Valley Potable Water System due to heavy rains and flooding.

[Relevant Project Elements](#)
 ✓ Construction Management

In response to heavy rains and flooding in March 2021, emergency construction work was needed for clearing debris; removing boulder embankment; building up perimeter rock wall; restoring wellsite grounds, electrical and mechanical underground lines, shoulder, road and well site, and chain link fence; repairing culvert under bridge; replacement of temporary water line; and tree removal.

The second phase of work includes expansion of the existing control building including electrical and mechanical control systems, well pump replacement and well discharge piping replacement, booster pump system repairs, steel tank reservoir repairs and water sampling station, portable generator, temporary erosion and sedimentation control, temporary potable water service, and construction phasing.

TLCG is currently performing the following duties:

- Perform daily jobsite inspections to verify the work is being accomplished in accordance with the contract documents and notify the owner upon the discovery of any defects and deficiencies in the work
- Complete daily reports which include information on the contractor's labor, equipment, and material usage as well as any significant incidents

- Investigate and take appropriate action on damage claims and complaints
- Conduct weekly meetings with the contractor to discuss construction progress, safety program, quality issues, submittal review status, material status, information requests, cost proposal requests, and design issues
- Coordinate site observations and jobsite meetings with owner, engineer, and contractor
- Process contractor submittals including requests for information, shop drawings, product literature and samples, test reports, and certificates
- Process change orders and contractor's application for payment and recommend for acceptance
- Maintain accurate and comprehensive project documents and jobsite correspondence
- Coordinate and conduct the pre-final inspection at the completion of construction
- Review contractor's marked-up as-built construction set

Project Status: Construction expected to be completed in 2025.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

Refurbished pump station building with new fuel tank

Fee - \$1,000,000
Construction Cost - \$6,685,000

Scope

Construction management services for the construction of improvements to the Waikapoki Wastewater Pump Station (WWPS).

Relevant Project Elements
√ Construction Management

The pump station improvements included upgrading the wet well and valve vaults, replacing the two existing vertical shaft pumps with horizontal shaft pumps, adding a new generator building, and new piping and duct bank work.

TLCG performed the following duties:

- Review the in-progress construction contract documents including plans, specifications, special provisions, permit applications, supporting reports, and other pertinent project information from the CM perspective
- Task management and internal project management services for constructability review
- Examine the plans and specifications for conflicts, lack of clarity, errors or omissions and items that could affect construction costs and schedules and obtain clarification from the design consultant as required
- Identify variances between scheduled and probable completion dates of construction activities and obtain updated construction schedules from the contractor as required to effectively monitor progress of work

- Conduct weekly Owner-Meeting-Contractor (OEC) meetings
- Process contractor submittals including requests for information, shop drawings, product literature and samples, test reports, and certificates
- Monitor the work to determine that the work is being accomplished in accordance with the contract documents and notify the client upon the discovery of any defects and deficiencies in the work
- Process change orders and contractor's application for payment
- Perform jobsite inspections and testing
- Investigate and take appropriate action on damage claims and complaints
- Maintain accurate and comprehensive project documents and jobsite correspondence

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

12-inch HDPE force main discharge valve manifold terminating into the Pre-Aeration Channel

*Fee - \$500,000
Construction Cost - \$3,441,000*

Scope

Construction management services for the construction of a new 4.3 MGD Return Flow Pump Station and force main at the Honouliuli Wastewater Treatment Plant (WWTP) to replace the temporary pump station.

Relevant Project Elements
√ Construction Management

The improvements consisted of a new underground concrete wet well, submersible pumps, valves, flow meter, diversion manhole, and other appurtenances. Electrical improvements included new variable frequency drives, control panel, and power feeders connecting to the existing electrical and SCADA system. A new 12-inch HDPE force main was installed to transport plant process return flows to the existing Pre-Aeration tanks.

TLCG performed the following duties:

- Review the in-progress construction contract documents including plans, specifications, special provisions, permit applications, supporting reports, and other pertinent project information from the CM perspective
- Task management and internal project management services for constructability review
- Examine the plans and specifications for conflicts, lack of clarity, errors or omissions and items that could affect construction costs and schedules and obtain clarification from the design consultant as required

- Identify variances between scheduled and probable completion dates of construction activities and obtain updated construction schedules from the contractor as required to effectively monitor progress of work
- Conduct weekly Owner-Meeting-Contractor (OEC) meetings
- Process contractor submittals including requests for information, shop drawings, product literature and samples, test reports, and certificates
- Monitor the work to determine that the work is being accomplished in accordance with the contract documents and notify the client upon the discovery of any defects and deficiencies in the work
- Process change orders and contractor's application for payment
- Perform jobsite inspections and testing
- Investigate and take appropriate action on damage claims and complaints
- Maintain accurate and comprehensive project documents and jobsite correspondence

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

New Elephant Exhibit at the Honolulu Zoo

Fee - \$625,000
Construction Cost - \$6,435,000

Scope

Construction management services for the construction of the new Asian Tropical Forest Elephant Facility at the Honolulu Zoo.

Relevant Project Elements
 ✓ Construction Management

TLCG performed the following duties:

- Examine the plans and specifications for conflicts, lack of clarity, errors or omissions and items that could affect construction costs and schedules and obtain clarification from the design consultant as required
- Identify variances between scheduled and probable completion dates of construction activities and obtain updated construction schedules from the contractor as required to effectively monitor progress of work
- Process contractor submittals including requests for information, shop drawings, product literature and samples, test reports, and certificates
- Monitor the work to determine that the work is being accomplished in accordance with the contract documents and notify the client upon the discovery of any defects and deficiencies in the work

- Process change orders and contractor's application for payment
- Perform jobsite inspections and testing
- Investigate and take appropriate action on damage claims and complaints
- Maintain accurate and comprehensive project documents and jobsite correspondence

Project Highlight

TLCG received a Letter of Appreciation from the client, commending our team's communication and management skills. Construction was completed on schedule, within budget constraints, and in accordance with the contract plans and specifications and to the quality standards expected of the project.

H. ADDITIONAL INFORMATION

30. PROVIDE ANY ADDITIONAL INFORMATION REQUESTED BY THE AGENCY. ATTACH ADDITIONAL SHEETS AS NEEDED.

Company Background

The Limtiaco Consulting Group, Inc. (TLCG) is the consulting company established by Mr. Felix B. Limtiaco, a former Director of the Department of Wastewater Management of the City and County of Honolulu. Founded in 1997, TLCG specializes in planning, design, and construction services for water, wastewater, stormwater, and water reuse infrastructure. The company is also experienced in general civil engineering projects.

Through 27 years of business, TLCG has grown its staff of complementing professional engineering services. The company has maintained an average of 43 employees over the past five years.

* Fourteen licensed civil engineers *
* U.S. Green Building Council member *

In 2016, the U.S. Small Business Administration selected TLCG principals as the Small Business Person of the Year for the City and County of Honolulu. The prized SBA award recognizes the best of the small business community.

Professional Qualifications

Project Approach

TLCG's Construction Management (CM) team is built on the philosophy that each client's needs are unique and should be addressed individually. Our team operates as an extension of our clients, providing quality project solutions customized to meet the clients' goals. TLCG understands that there are many different agencies, parties, and stakeholders who need to be communicated with during the course of a project, and we take pride in our ability to successfully facilitate meetings and resolve issues with affected parties. TLCG believes effective communication and coordination are just as vital as the work quality and project budget to ensure a successful project.

TLCG construction managers minimize costly project delays and cost overruns by communicating effectively and working closely with the contractor and owner to ensure that construction is completed with minimal public disruptions. The TLCG approach to construction management consistently saves owners time and money, while ensuring a quality work product.

In addition to traditional construction management tasks, TLCG has provided project management services on challenging projects with issues during construction. TLCG supports the owner on projects administered by other consultants until resolution is achieved and the project is completed. Tasks include exploring new alternatives to optimize the internal construction management process, management forecasting and preparation, privately constructed asset acceptance and turnover, and internal agency coordination and communication.

A thoughtfully planned public outreach program is highly beneficial for informing residents and users of the project scope, impact, and schedule. Our CM team is experienced in working with various contractors to keep our elected officials and the public updated with project information to lessen the impact to residents and minimize complaints.

Project Team Composition and Leadership

TLCG's CM group is led by two Certified Construction Managers and one Certified Associate Construction Manager accredited by the Construction Management Association of America and is comprised of 6 Professional Engineers, 5 Engineers-in-Training, and 5 Inspectors. Mr. Ian Arakaki will serve as the Principal-in-Charge for the project team. Every CM project is overseen by Mr. Arakaki and managed and completed by one of our Professional Engineers.

For large-scale construction projects, it is more cost effective and logical to incorporate specialized construction inspectors into our CM team. TLCG has a working relationship with SSFM to utilize their construction inspectors as added resources and for special inspections.

It is our belief that in order to provide exceptional CM service, our team members must have a broad range of skill sets and experience in the construction industry. TLCG believes the Construction Manager is not only responsible for managing the contractor and quality control, but also serves as the bridge between the design and construction phases. Therefore, it is TLCG's philosophy that all CM engineers possess civil design and permitting experience in addition to extensive field/construction experience.

TLCG's greatest asset is its people. Comprised of motivated, experienced, creative, and practical professionals, TLCG is eager to solve the toughest engineering problems. The experience and qualifications of the key personnel for the project team are provided.

Ian Arakaki, P.E., CCM

Mr. Arakaki has 28 years of experience on civil, sanitary, and environmental projects. His construction-related experience in Hawai'i includes Design-Bid-Build, CM-at-Risk, and Design-Build projects, and he is responsible for all construction management and observation projects.

In addition, Mr. Arakaki is responsible for providing program management services for the Board of Water Supply, the City and County of Honolulu's Department of Environmental Services, and Hawai'i American Water. As a direct result of his exemplary management skill and ability to deliver quality end results, TLCG has remained the preferred consultant for the private utility for the past 22 years.

Eric Arakawa, P.E., CCM

Mr. Arakawa has 22 years of civil engineering design and construction experience. His projects include roadway infrastructure and utilities design, site development, and construction management of water and wastewater upgrades. He was selected as Hawai'i's Young Engineer of the Year in 2016.

Brandon Whitaker, P.E.

Mr. Whitaker has 13 years of experience in civil engineering and construction management. His projects include stormwater pollution prevention, wastewater collections systems, force mains, and pump stations.

Jacqueline Nguyen

Ms. Nguyen has 2 years of construction experience on civil and sanitary engineering projects involving water and wastewater infrastructure upgrades.

Justin Barnes, P.E.

Mr. Barnes has 10 years of experience on civil and sanitary engineering projects. His projects include wastewater system design, stormwater pollution prevention, and construction management.

Timothy Choi

Mr. Choi has over 1 year of construction experience on civil and sanitary engineering projects involving site development and water/wastewater infrastructure upgrades.

Megan Ueno, P.E.

Ms. Ueno has 12 years of civil engineering design and construction experience. Her projects include design of wastewater collection systems, utility improvements, and site development; project management and construction administration for drainage improvement and street rehabilitation projects; and construction management.

David Goya

Mr. Goya has over 43 years of construction experience, including 15 years as a Construction Inspector for the City and County of Honolulu on roadway, drainage, and wastewater (treatment plants, pump stations, and sewer lines) construction projects.

Kevin Fong, P.E.

Mr. Fong has 18 years of experience on civil and structural engineering projects. His projects include water quality studies, project management, construction management, and the repair/renovation/retrofit of existing structures.

Scott Lai, CACM

Mr. Lai has 9 years of experience on asphalt concrete paving, water, and wastewater construction projects. His projects include removal and installation of new asphalt pavement, restriping of parking lots and roadways, and construction management of water and wastewater infrastructure upgrades.

Davi Corcio-Alvarez, E.I.T.

Ms. Corcio-Alvarez has served as Project Engineer for over 9 years on construction projects involving condominium development and building renovations and construction management of wastewater infrastructure upgrades.

Paul Serikawa

Mr. Serikawa has 15 years of construction inspection experience on stormwater pollution prevention projects, including construction oversight and administration services for the Hawai'i Department of Transportation Storm Water Management Program Plan and 3rd party stormwater inspections for the City and County of Honolulu's NPDES Permit.

Jerome Do

Mr. Do has 7 years of experience on civil and sanitary engineering projects. His projects site development, water/wastewater infrastructure upgrades, stormwater pollution prevention, and construction management.

Aaron Katagihara

Mr. Katagihara has over 9 years of experience serving as Project Coordinator on asphalt concrete paving projects and Inspector of stormwater and wastewater construction projects. His projects include removal and installation of new asphalt pavement, guardrail repair and replacement, stormwater inspections, and wastewater infrastructure upgrades.

Past Performance on Contracts

TLCG has established a successful track record and positive reputation for providing high levels of performance with government and private sector clients. TLCG management completes projects meeting stringent performance criteria in a practical, timely, and cost-efficient manner. Clients routinely reward TLCG with new projects, reflecting confidence in professional judgment, value, and commitment to customer service. By collaborating with clients, TLCG is able to develop project-specific criteria to solve the toughest problems.

CERTIFICATE OF APPRECIATION

The firm's largest client, the City and County of Honolulu, Department of Environmental Services, Division of Wastewater Engineering and Construction (formerly DDC – Wastewater Division), recognizes one outstanding consultant each year with a Certificate of Appreciation. TLCG was awarded this certificate, which acknowledges exceptional engineering services, in 2006.

ENGINEERING EXCELLENCE

TLCG received an Honor Award at the 2010 Engineering Excellence Awards Competition held by the American Council of Engineering Companies – Hawai'i. The award is for superior engineering services provided by the firm for the State of Hawai'i, Department of Land and Natural Resources (DLNR) and Ka'a'awa residents whose homes were in imminent danger of collapse following the 40 days of rain in 2006. *"The Limtiaco Consulting Group designed a project which was on time and came in under budget. The ability to do those things, while adhering to a compressed design schedule, is the hallmark of a technically competent firm,"* said Carty Chang, Chief Engineer of the DLNR, Engineering Division.

BEST WATER/WASTEWATER/ENVIRONMENTAL PROJECT

TLCG's Pearl City Force Main Slip-Lining Repair project for the City and County of Honolulu, Department of Design and Construction was awarded the Best Water/Wastewater /Environmental Project at the 2013 ASCE Hawai'i Section Outstanding Civil Engineering Achievement Awards Banquet. This project was spurred by consecutive pipeline breaks within a 250-foot section of 30-inch and 42-inch dual force mains. The project was declared an emergency because the public's health and safety were in imminent danger due to the large service area associated with the force mains. This project also won an Excellence Award at the 2014 Engineering Excellence Awards Competition.

BEST SMALL PROJECT

The Mana Drag Racing Strip Improvements project located in Waimea, Kaua'i was awarded the Best Small Project Award at the 2015 ASCE Hawai'i Section Outstanding Civil Engineering Achievement Awards Banquet. TLCG performed civil design and construction management services for the State of Hawai'i, Department of Land and Natural Resources for the resurfacing and reconstruction of the NHRA-sanctioned drag strip to provide a safe and functional facility for motor sports on Kaua'i.

BEST SUSTAINABILITY PROJECT

The Wahiawa Police Station NPDES Small MS4 Permit Program Improvements project was awarded the Best Sustainability Project Award at the 2017 ASCE Hawai'i Section Outstanding Civil Engineering Achievement Awards Banquet. This project was one of the first projects in Hawai'i solely developed to improve stormwater quality; it was completed prior to the issuance of local guidelines on Low Impact Design or structural BMP standards. TLCG earned an Honor Award for this same project at the 2018 Engineering Excellence Awards Competition.

HONOR AWARD

TLCG received an Honor Award at the 2024 Engineering Excellence Awards Competition held by the American Council of Engineering Companies – Hawai'i for the Wailua Sewage Pump Station No. 1 Rehabilitation project located in Lihu'e, Kaua'i. The County of Kaua'i faced a public health and environmental problem when one of the pump stations stopped functioning, leaving this aging facility at risk of wastewater spills. TLCG designed a facility retrofit to expand the wet well access and accommodate two new pumps. Even amid the COVID-19 pandemic, this project was completed under a strict time constraint to ensure the public's health and safety.

Quality Control / Capacity to Accomplish Work in the Required Time

TLCG's work quality is based on the wisdom and engagement of experienced principals and project managers. Successful project management begins with the development of a concise and objective-oriented scope of work and is maintained through effective communication with the client, stakeholders, and project team. TLCG employs tried-and-true project control practices to track productivity, maintain costs, and meet or exceed project milestones, while ensuring a high-quality work product. TLCG engineers have more than 330 years of combined project management and engineering experience.

TLCG maintains five guiding philosophies to ensure project success:

1. **Quality, above all else**
2. **Service capacity**
3. **Effective communication**
4. **Resourceful employees**
5. **Redundancy**

QUALITY, ABOVE ALL ELSE

TLCG's driving philosophy is its commitment to quality engineering services. The company recruits diligent and talented employees, committed to successful projects and happy clients. TLCG understands commitment to quality customer service is more important than profitability. TLCG engineers genuinely care about their projects and clients.

SERVICE CAPACITY

TLCG maintains a database to track current staff workload relative to upcoming project milestones. This tool allows TLCG engineers to produce 40 to 45 quality hours of work each week. Practical employee expectations promote healthy work-life balance, resulting in happy and dedicated employees. In addition to managing the workload for existing employees, TLCG routinely seeks talent before the critical need arises. This philosophy ensures an ample amount of engineering capacity while proactively controlling the quality of each employee added to the company.

EFFECTIVE COMMUNICATION

TLCG invests in relationships through effective communication. TLCG engineers are empowered to create and cultivate professional relationships with clients and approving agencies to ensure project success. TLCG engineers are encouraged to communicate both good and bad news because it's the right thing to do. Effective communication – which TLCG recognizes requires a tremendous amount of listening – builds trust and relationships.

CROSS-TRAINING

TLCG services are generally comprised of three disciplines: Planning, Design, and Construction Management. TLCG invests in training employees across the three disciplines because adaptable engineers are better prepared to solve difficult problems. TLCG engineers are prepared with broader experiences, armed with deeper appreciation of the various phases of a project life cycle. This core philosophy also allows TLCG to use engineers interchangeably to manage dynamic workloads. TLCG staff members are prepared to temporarily assist with critical deadlines, thereby increasing TLCG service capacity.

REDUNDANCY

TLCG builds redundancies for each key employee. This company philosophy ensures that clients and projects will continue to be serviced at high levels even when unanticipated events occur. Employee redundancy practices were exercised when the company was just four years old. In 2001, president and founder Felix Limtiaco died unexpectedly. TLCG was not only able to survive the tragedy, but the company continued to thrive because of its reliable employee redundancy practices.

Conflicts of Interest

TLCG does not have any conflicts of interest in performing services for the County of Hawai'i.
