Subject: Plastic waste bill 83
Date: Tuesday, October 21, 2025 10:29:14 PM

Aloha,

I am writing to show my support for the new bill 83 which would require government functions to use compostable products instead of plastic products that end up in the landfill and the ocean.

Plastic is killing our planet. We must do everything we can to support alternative, compostable materials whenever possible. My daughter just participated in the Hawaii Zero Waste program and came home traumatized after learning about the environmental disaster that trash and plastic are causing. Please help us ensure a safe planet for her future.

Thank you for your consideration,
L. Katherine Sackett
