

CoHnect News email 10/5/25

Alert!

The CoHnect Support team is aware of two issues throughout the course of this past week: 1) Missing assignment notifications; and 2) Missing PCard transactions. Should you experience either of these issues, please **do not** open a ticket. Stay up to date on these issues by reading this and future CoHnect News emails.

Missing Assignment Notifications

Last weekend, a patch was applied to CoHnect that appears to have disrupted the workflows that govern notifications.

Description of Issue:

Notifications within the Bell icon, on the Notifications page, and to the “Things to Finish” cards function off of the same workflow. This workflow appears to be randomly delivering some notifications, while not delivering others. The resolution is still under investigation.

Workaround:

Go to the Worklist page and find all items assigned to you via the “My Tasks” option. You can also use the search field provided to find specific invoices or requisitions assigned to you. For more information on how to get to the Worklist, including a helpful CoHnect navigation tip, check out [📄 CoHnect - 4 Ways to get to the Worklist.docx](#).

Missing PCard Transactions

Many are reporting PCard transactions missing from the Expense Reports. **Purchasing and DIT will have this resolved this week.**

Thank you for your patience with these issues.
