RE: Land Fund

Aloha,

I would like to express my concern regarding the 2% Land Fund. I would like to see this reinstated on behalf of our future generations. There is not enough land for public use on this island. By setting aside and purchasing selected parcels, we will ensure that there will be undeveloped property for future generations. 63% of the population voted for this. It should be followed through. My husband and friends also feel the same way. The people voted on this in 2006. It should not be up to the charter commission to change this. Now is the time to save land from development. Please consider the public's view as that is who should be represented. This may be late for the Jan. 21st meeting but just want to express my concerns over this issue. Please reinstate the 2% Land Fund.

*Thank you,
Marta Finley*
