This application must be accompanied by one set of presentation size (recommended 24" x 36") and eleven sets of reduced size (recommended either 11" x 17" or 8-1/2" x 11") of the site plan drawings (same information as required for Plan Approval application; see attached). For presentation to the Kailua Village Design Commission, the applicants should make certain that the following are also clearly depicted in the submitted drawings:

- (1) Site plan showing TMK parcel boundaries, and showing existing and proposed building locations;
- (2) Building elevations showing the architectural design of the building exteriors, depicting or describing proposed exterior colors and materials. Notation of ground elevation with contour lines or selected spot elevations is recommended. Earth tone colors are recommended. Color samples should be provided. If reasonable and appropriate, samples of exterior building materials may be provided; and
- (3) Location, design, and colors of proposed sign(s), if any.

All submitted drawings and samples of colors/materials will not be returned.

**Stabilized Construction Entrance**  
All points of egress and ingress to a site shall be protected with a stabilized construction entrance

Stockpiles shall not be located in drainage ways or other areas of concentrated flows. Sediment trapping devices such as fences, traps, basins or barriers shall be used around the base of all stockpiles.

Dust control should be applied to reduce dust emissions. The Contractor, at his own expense, shall keep the project area and surrounding area free from dust nuisance. The work shall be in conformance with the air pollution control standards contained in the Hawaii Administrative rules: Chapter 11-60, Air Pollution Control.

Sediment trapping devices such as fences, traps, basins or barriers shall be used down slope of all disturbed areas and around the base of all material stockpiles.

Surface flow from above an exposed slope shall not be allowed to flow over the slope without protection. Slope protection shall be used on areas with slopes greater than 50% and on areas of moderate slopes that are prone to erosion.

All storm drain inlets on site, and those offsite which may receive runoff from the site shall use an inlet protection device.

Is not required when the disturbed area will be worked within a 14 day period. Stabilization is required for disturbed area at final grade and for those areas that will not be worked within a 14 day period.

All disturbed areas shall be permanently stabilized prior to removing erosion and sediment control measures.

In the event any previously unidentified historic or burial objects are discovered during construction, work shall immediately stop and the State Historic Preservation Office of the Dept. of Land and Natural Resources shall be advised. Work shall not resume until approved by SHPO and/or other relevant agencies.
