2018-2019 ACTION PLAN OF THE CULTURAL RESOURCES COMMISSION

2020 UPDATE, MILESTONES, AND FUTURE ACTION ITEMS (STAFF UPDATES)

2018 Goals and Activities

1. Continued training for commissioners, officials and staff.
   a. County and State historic preservation laws and procedures.
   b. Using in-house talent for educational opportunities:
      i. Historic trails, archaeology, environment, traditional protocol, historic districts.
   c. Develop orientation program for new commissioners.

CRC members attended one training session related to Anchialine Ponds. Previous Commission member Deborah Chang led a morning information/training session which concluded with a site visit to Anchialine Ponds located adjacent to NELHA in Kona.

CRC Staff is currently working to organize a State-wide training symposium for CRC's across the State. The intent of the meeting is to gather CRC members together to share knowledge and information regarding historic preservation, and other issues of interest. There will also be training "break-out" sessions to provide learning opportunities related to land use planning, historic preservation laws (i.e., Section 106, 6E), and other topics that are relevant to bolstering CRC members knowledge base to better serve their respective Counties.

2. Compile a historic properties inventory.
   a. Continued research into preservation plans (subcommittee).
   b. Continued site inspections to sites subject to preservation (subcommittee).
   c. Continue working toward a more user-friendly and accessible inventory
      i. Identify ways to incorporate community contributions.
   d. Continued action on coordinating historic preservation reviews with the State Historic Preservation Division (SHPD).

CRC will select a sub-committee for the above noted topics (preservation plan research and site inspections.

CRC staff has provided an example of an inventory list, includes both cultural and architectural sites.

CRC staff needs more guidance on the CRC preferred listing style, the amount of information to be on the list, and the types of sites that will be included on the list (i.e., only ones on the Register, or all mapped arch/cultural sites).

3. Identify descendants, knowledgeable persons and agencies that the Commission should be working with to learn about historic preservation needs throughout the island. Should include experts, such as kūpuna and a historic preservation professional in regional visits.
   - Seek opportunities to host CRC meetings throughout the island.
   - Learn about historic preservation needs throughout the island.

The CRC would need to provide this list as they are the "experts" and have the community connections to locate "knowledgeable persons". CRC members can make recommendations and provide contact information so CRC Staff can follow up. CRC can decide to meet with those community members at the monthly CRC meeting, or conduct "Special Meetings" to confer with community members who may be reluctant to share lineal knowledge or historic information with the public.

CRC will be holding its March 2020 monthly meeting in Kona, the first step in hosting CRC meetings across the island.

4. Work with the SHPD to access CLG funds.

CRC staff has begun to coordinate a Statewide CRC Symposium to be held on Hawaii Island for the three (3) CLG Counties (Kauai, Maui, Hawaii). The CRC symposium will be utilizing CLG grant monies to host and manage the symposium. CRC staff has discussed this potential grant with the SHPD CLG coordinator, and they support the idea. The Symposium must be completed by September 30, 2020 in order to be eligible for grant funding. The application for the CLG grant will be submitted to the SHPO for review prior to submittal to the National Parks Service (NPS) who has final authority over these CLG grants.

Need to clarify how this symposium can be accomplished while maintaining the sunshine laws related to public meetings.

5. Review and comment on General Plan Amendment

CRC has reviewed the General Plan and provided comments in 2018, and then was provided an update from the County Planning Dept. Long Range Planning Division in 2019 on how the CRC comments were included in the General Plan (GP) and what further action may be provided by the CRC to assist in the GP2040.

The CRC will have another opportunity to review the GP prior to going before the County Council, Long Range Planning Div. has stated the projected timing of the CRC review would be Summer 2020.
