Subject: BIG ISLAND GENERAL PLAN 2045
Date: Tuesday, October 29, 2024 7:35:36 AM

Being a resident of Honolulu Hawaii I recently took a trip with my niece to the Big Island.

Having visited many times throughout my life it is my favorite outer island.

The residents, farmers & small businesses need to be supported not derailed in the future. We need to support our agriculture for the life blood of Hawaii. We have had to rely on the mainland & other countries for our food supply. We need to become self sustaining. Since we rely on tourism already we can make both work for the people of the islands. Stop with the climate change that restricts peoples freedoms. This plan sucks. It need to be put into the shredder and rewritten.

With Much Aloha
