This so-called general plan it's worthless and value and it needs to be scrapped. There's far too much be in it. It has a lot of wordsmithing going on to appear one way but in reality it's just a game and anybody on this panel did you go and check out the book the great Maui land grab, I didn't think so but I think you really should get that book and look at it because you guys are stepping all over your words up here on the panel because all the proof is in the book and people can't see what they saw what we learned now everybody on this panel I'm gonna say you've been caught in the act of Money money grab grab you money grubbers and you've been caught and more of the world needs to know what's going on over here when you talk about corporations you're not talking about people you're talking about an entity who only is there for money just like Halloween it is designed to make money And it also serves as a guide to the evil people and all those blood sucking in Torino chrome people they will be euthanized because they are danger to our society just like the people on this panel to the people and sugarcoating it with a smile and it's just not gonna work Listening and I think everyone needs to put their opinions in because the more opinions are noted the more the government knows we know what's going on. The people know the people know corruption when we see it.
