Very good brochure from I think 2012 (?) regarding sustainable development goals of the UN and how it is that the language and the philosophies of this group have become a part of our lives and vocabulary without our conscious choice or awareness. Watch for key words like stakeholders and land use influence and where it leads. It leads to tyranny of non-elected people with a common goal. The goal is not liberty, not freedom of choice, ultimately not even freedom of religion.

Facts and reality are wilder than fiction!

Lord give us the grace to navigate this broken world with honor and truth and courage to live by our conscience in our daily lives. With clean hands and our hearts as unto You.

My prayers and aloha.

Kevin
