

EPIC Response Document
Application No.: PL-USE-2026-000042
Response to Email Testimony by Mr. Edward Johnston
Submitted 5/20/2026

Project: Big Island Neuro Health Clinic

TMK: 2-8-007:084

Location: 28-1167 Old Mamalahoa Hwy Pepe'ekeo, South Hilo, Hawai'i

Date: 5/26/2026

The Applicant respectfully submits the following response regarding statements made in public testimony concerning PL-USE-2026-000042.

The testimony references the National Provider Identifier (NPI) Registry listing associated with Big Island Neuro Health Foundation and raises questions regarding whether clinical operations are already occurring at the subject property.

The NPI registration and associated practice address were established during the organizational development and healthcare credentialing preparation phase of the proposed project. The NPI enumeration date reflects the initial administrative registration date. As with many startup healthcare organizations, administrative registrations, organizational structures, and associated records evolved during the formation phase of the nonprofit organization and proposed clinic planning process, including subsequent organizational filings, trade name approval, and later updates reflected within the NPI record.

Importantly, the existence of an NPI registration or listed practice address does not authorize or indicate active clinical operations at the property.

No outpatient medical, psychiatric, or Transcranial Magnetic Stimulation (TMS) services are currently being provided at the subject property.

Any future healthcare operations remain contingent upon County approvals, permitting, and compliance with all applicable State and Federal requirements.
