To: General Plan

Subject: We protest

Not once was community input allowed despite spending millions writing one that made sense . The urban developers took over . The roads not paid for all go through the Hawaiian acres pure agricultural subdivision against emergency response . There is no resemblance to the original plan You just pay HPP and volcano but owe HA road money 80 million . Why you think 2900 signed against it . This goes back to bj leithead Todd and bob Jacobson violating the master plan .

No we. Voted no
