

Power, Viewplanes, & Erosion Control Subcommittee report to
November 14, 2016
North Kohala CDP Action Committee

Power

Subcommittee work continues on a map of Kohala combining potential HELCO transmission loop routes, viewplanes identified in various view studies, and lands preserved for open space.

Viewplanes

The subcommittee is working with Parks Water and Roads, Growth Management, and Community Access Group on a continuing discussion with residents near Pololu Lookout concerning what types of improvements are preferable to enhance the experience for visitors, including a better view of the valleys, while lessening the impact on those who live nearby. The joint effort will lead to a broader community discussion of recommendations for the future of the lookout and access, including public or conservation purchase of the land between the lookout and Akoakoa Point.
