**Subject:** Fw: The April 8, 2021 issue of The Environmental Notice is now available and so is Environment Hawaii's April 2021 newsletter about cesspool damage!

Aloha DEM-Wastewater,

You are now one year late in issuing the Naalehu Large Capacity Cesspool (LCC) Closure Draft Environmental Assessment (EA).

The Naalehu EA contract c.007672 Exhibit C had Wilson Okamoto submitting the Naalehu EA to OEQC for publication in *The Environmental Notice* on April 6, **2020**.

Since closing cesspools is identified in *Environment Hawaii* as such a major problem, how come no one is asking why this million dollar contract has not been monitored for compliance in over one year?

Thank you for letting me know if and when the Naalehu EA will be published so I will know where the million dollars in my taxes went.

Sandra Demoruelle
