Dear Environmental Management Commission Chair and Commissioners:

You can lead a horse to water but you can't make him take his shoes off.

Everybody in the Department of Environmental Management and all County Council members have refused to look into the financial fiasco surrounding the Naalehu sewer boondoggle.

The previous District 6 Environmental Management Commissioner was hostile towards me at meetings when I tried to inform commissioners about what has side-tracked a simple solution to the EPA's gang-cesspool conversion mandate.

Thankfully, our new Commissioner can see the situation, whereas, the previous Commissioner was part of the problem and the rest of the Commissioners just ignored it.

Please ask yourselves: If our gang-cesspool is such a threat to public health and the environment, then where is the evidence? Why do we need an expensive monumental project?

The Trojan Horse in Naalehu is full of outside consultants. Another question is how much money have they already grabbed from the County's counting house? And who opened the gate?

Jerry Warren
