

**Testimony to the Hawaii County Environmental Management Commission
May 26, 2021**

An open letter to all Department of Environmental Management Commissioners, past and present:

The Federal Government created a law which prohibits the use of gang cesspools. The Environmental Protection Agency enforces that law. They are slack with enforcement in Naalehu.

The County of Hawaii is in violation of the federal law. They are negligent.

The Naalehu homeowners who are connected to the illegal gang-cesspool are forced to pay a sewer bill. The County is oppressive.

The Department of Environmental Management Commissioners must not ignore the laws which they are sworn to uphold. They ignore these laws. They are guilty of malfeasance.

Jerome Warren
