Aloha,

Plastic pollution is a serious problem.

There is no shortage of the science and research on why this proposal should never be permitted in Hawaii.

"Recycling" does not solve the plastics problem. It only makes it worse. Malama One's proposed project is unacceptable.

Our Land, Air, Water, and Public Health and Safety can NOT be a sacrificial lab rat for this attempt to extract our precious water and pollute our island and people for PROFIT.

Plastic recycling generates micro and nanoplastic pollution. It also concentrates dangerous chemicals in the recyclate.

We need to establish reuse infrastructure, NOT Malama One's greenwashed, so-called "recycling" proposal.

David Hunt, Honoka'a, HI
