3. A written narrative, including the following background information on the subject request:
 - A Detailed written description of the proposed use, a statement of objectives and reasons for the request, including proposed hours of operation and number of employees/clientele.
 - B. Description of the subject property in sufficient detail to precisely locate the property. Describe existing uses, structures, and topography. If portion of property to be used, state use of remainder of property.

Examples include human skeletal remains, structural remains, sand deposits, midden deposits, and lava tubes. The application may be provided to the State Department of Land and Natural Resources Historic Preservation Division (SHPD) for a determination of whether the project will affect archaeological/historic resources. Please be aware that a hearing before the Planning Commission may not be held until SHPD and the Planning Department determines resources on the property are adequately identified, recorded, mitigated and/or preserved.

Valued Cultural Resources: Identify any traditional and customary native Hawaiian rights that are exercised in the area; the extent in which the proposed development will affect these rights; and feasible action to be taken to protect native Hawaiian rights if they exist. Examples include areas of traditional collection of terrestrial resources (kī leaf, aho chord, thatch, medicinal plants, and ferns) or marine or riparian resources (limu, 'ōpae, 'o'opu, hīhīwai) used for subsistence, cultural and religious purposes. Traditional and customary rights may also include rights of access to the archaeological and historical resources of the property.
